DAYTON, Ohio, July 17, 1972 --- The University of Dayton is currently holding its twelfth Annual Workshop, "Business Systems & Data Processing: A Career Oriented Approach," July 6-July 27.

The Workshop, offering graduate credit from UD and co-sponsored by the Department of Education, State of Ohio, is designed specifically for Business Education teachers and administrators who seek familiarization with modern data processing concepts, techniques, and equipment.

Prominent authorities from Guidance, Education, Systems, and Data Processing are conducting lectures, discussions, demonstrations, field trips, and practice sessions. Richard Brinkman, who took part in the first 1961 Workshop and who is now Superintendent of the Vocational and Technical School at Springfield, and President of the Clark Technical College, is one of the feature speakers.

Mr. Brinkman was the developer of both institutions, which were lauded by Ohio's Governor as "two of the finest in the United States today."

The workshop, directed by Prof. Robert E. Kriegbaum, Secondary Education, and Dr. Ellis Joseph, Acting Dean, School of Education, has ten participants enrolled, and is an Ohio Intensive Office Education Qualifying Workshop.
