

Isolation

distance shown with data

“It is an artist’s duty to reflect the times.”

–Nina Simone

About the Data:

During this week I tracked all the moments of where and when I heard or read the word coronavirus. I also tried to give context surrounding these moments by documenting the source of where the information was coming from and who was with me in each moment.

Tracked from Friday, March 13, 2020 – Sunday, March 21, 2020

How to Read it?

Each day of the week is a strand of data. Color defines the source of the information, and any additive elements define the individuals involved or other details about the moment.

Each • represents a moment and the added elements (symbols or colors) give more detail of each moment in time.

Colors:

- = saw something on social media (facebook, instagram, snapchat)
- = told by a family member
- = TV
- = groupchat with the roommates
- = emails
- = other (strangers behaviors, friends conversations, etc.)

Additive Elements:

- = mom
- = dad
- = Raeanne (my sister)
- = Scott (my brother-in-law)
- = Opal (grandma)
- = me
- = I sent a message regarding the virus
- = memes or pictures made about the virus
- = I sent a meme
