Phishing Module

Thursday April 19, 2018

By Abby Papenfus, Graduate Assistant

According to [PhishMe](#), 91% of all cyber attacks start with a phishing email. Phishing scams exploit human error, bypassing even the best technical safeguards through social engineering.

Businesses are often the target of phishing attacks. [Wombat Security State of the Phish](#) reported that 76% of businesses fell prey to phishing attacks in 2017. However, through increased awareness and education, businesses can better mitigate these threats.

Do you know the signs of a phishing attack? Are you capable of protecting yourself and your organization?

A FEW WORDS ABOUT...
AVOIDING PHISHING ATTACKS
