

September 15, 2023

Dear community members,

As the fall season and another academic year begin, I am proud to share some highlights from the past year.

Premedicine and predentistry continue to be popular majors, and UD is experiencing increased enrollment in other pre-health majors across campus. In order to serve this growing body of students, our office is expanding into the [Pre-Health Resource Center](#) with a broader mission.

Thanks to the support of UD leadership and the faithful Flyers in our community, our students have rich opportunities to explore vocation, engage in experiential learning and benefit from personalized advising.

2022-23 Premedical Program highlights:

- UD's new Pre-Health Resource Center (formerly Premedical Programs Office) has a new, broader mission, to support students of any major who plan to attend a health professional school after graduation. [Learn more.](#)
- Acceptance rates for our grads to medical and dental school were 82% and 100% respectively. [View the 2023 graduation awards and see where our grads are going next!](#)
- The 13th annual University of Dayton & Miami Valley Hospital Healthcare Symposium, [Building Our Community: Partnering for Wellbeing](#), featured dynamic speakers, panel discussions, awards, and the student research poster session.
- International Medical Experiences continue to be impactful experiences for students. Read about [this year's trip to Panama](#).
- [Weekly seminars](#) and small group meetings with guest speakers from regional medical, dental, and professional schools provide valuable networking and career exploration opportunities for students.

Healthcare professionals and recent graduates: Help inspire the current generation of premedical Flyers [by emailing our office](#) with your professional achievements, opportunities, and events.

Thank you for your interest and support in the faithful formation of our students.
