Discovering similarities

 udayton.edu/magazine/2017/01/discovering-similarities.php

Larry Burgess • January 27, 2017

Samantha Monendob (from left), first-year pre-med major from Kalamazoo, Michigan, Ben Bratton, first-year computer science major from Ann Arbor, Michigan, and Tijaun Kelly, sophomore psychology major from Chicago, learn about the evolutionary relationships of animal skeletons in a biology lab in the Science Center. Here they compare the bones of a large bird's skeleton with other animal bones.
