

just like a hundred years past... when
the deadliest pandemic ever is still causing problems today
The 1918 flu is still with us: The deadliest pandemic ever is still causing problems today
1918 or 2020?
1918 2020 coming soon!
over 50 million people "fish" dead
few of them wore a mask
and despite doing everything in his power... the man drowns, like a lost fish caught under it all
