Conference on the Future of School Psychology

at the University of Dayton

The University of Dayton School Psychology Program recently participated in the 2012 Conference on the Future of School Psychology. This conference provided students and faculty at The University of Dayton the opportunity to participate in a national dialogue on the future of our field. This multi-site conference was jointly sponsored by the National Association of School Psychologists, Division 16 of the American Psychological Association, the Society for the Study of School Psychology, the Council of Directors of School Psychology Programs, Trainers of School Psychologists, the American Academy of School Psychology, the American Board of School Psychology, and the International School Psychology Association. This conference was a continuation of the work initiated in the 2002 Futures Conference, and the mission of the conference was to better our lives. The Futures Conference was designed to facilitate local, state, national, and international connections, to encourage worldwide groups to examine opportunities within their local contexts, and to support development of sustainable action plans.

A number of host sites around the world, including the University of Dayton, were established in advance. Host sites had the option of viewing live or archived versions of the webinar sessions. The conference consisted of three webinars related to the following themes: Leadership, Critical Skills, and Advocacy. The sessions allowed school psychologists, university faculty, and graduate students to gather together to analyze, debate, and discuss school psychology's contribution to children, their schools, and their families. This online "working conference" involved significant background preparation, ongoing discussions, critical analysis, consensus building, and the design of specific action plans.

The three webinars were intended to increase professional development, and to create collaborative initiatives that promote both academic success and positive mental health outlooks for children. Participants could view each webinar as it was streamed live or through the archive on the conference website. Each theme in the conference contained a keynote speaker, featured speakers, and panel presenters. After viewing the webinar, participants used the Futures Conference Action Planning Handbook to collaboratively discuss strategies and possible proposals for integrating leadership, critical skills, and advocacy in current and future practice as school psychologists.

The Leadership webinar identified leadership to be a key influence on academic success and a necessary component in the role and function of a school psychologist. The leaders of this session discussed strengths and challenges associated with the development of leadership by and for school psychologists. The Critical Skills webinar discussed the knowledge and skills needed to practice effectively as a school psychologist. This multi-faceted profession requires a knowledge base of the academic, behavioral, and social-emotional needs of school-aged children, in addition to the necessary skills for consultation, counseling, and crisis support.
The final webinar on Advocacy covered the importance of advocating for children in the schools, school psychology as a profession, and for the use of evidenced-based assessments and interventions in the school setting.

UD focused on Leadership for its action plan. Through discussion in groups and in an online forum, students at the University of Dayton were encouraged to collaboratively explore opportunities for leadership at The University of Dayton and in the field of school psychology. Three action items related to leadership were collaboratively identified by faculty and students. For each, responsible parties and a timeframe were developed, along with major activities and concrete, measurable steps that will allow us to carry out each plan. Our action items focus on going into the community to recruit diverse applicants, developing professional development opportunities for local school psychologists and educators, and further developing our study abroad initiative. The following table outlines the program's plan related to each action item.

<table>
<thead>
<tr>
<th>Action Item</th>
<th>Responsible Party &amp; Timeframe</th>
<th>Major Activities, Action Steps</th>
<th>Progress Indicator, Outcomes</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Recruitment of potential graduate students from diverse backgrounds, with unique skills (e.g., bilingual)</td>
<td>-Program Faculty</td>
<td>1) Presentations to undergraduate classes and honor societies (e.g., Psi Chi) during School Psychology Awareness Week 2) Present to local teachers (highlight part-time track) 3) Encourage international student applications to UD's school psychology program (ties to #3) 4) Improve website (increase accessibility and visual appeal)</td>
<td>Number of successful applicants from diverse backgrounds</td>
<td>1) Completed</td>
</tr>
<tr>
