Introduction

According to Peter F. Drucker (1909–2005), a revered and prolific writer in the field, “management pertains to every human effort that brings together in one organization people of diverse knowledge and skills.” Managers in both the for-profit and nonprofit arenas share similar responsibilities, he wrote, “among them defining the right strategies and goals, developing people, measuring performance, and marketing the organization’s services.” (*The Essential Drucker: The Best of Sixty Years of Peter Drucker’s Essential Writings on Management*. New York: HarperCollins, 2001, pp. 7–8.) Planning, organizing, leading, directing, and controlling are functions traditionally ascribed to management, but the field comprises numerous subdisciplines, including management science, organization studies, strategic planning, decision-making, leadership studies, human resource management, cross-cultural and international management, quality management, supply chain management, knowledge management, logistics management, crisis management, product innovation management, management communication, management research, manufacturing and service operations management, and project management.

The selection of management journals and magazines discussed in this section include scholarly, peer-reviewed sources as well as publications intended for practitioners and general readers. They offer a mix of theoretical articles, empirical research reports and pragmatic advice, and article summaries and book reviews that can be easily processed by busy professionals. Most of the publications are now available in both print and online formats, and ISSNs for both are included in the annotations when this is the case. Many journals also offer open-access options to authors, who for an additional fee can make their articles available online to both subscribers and non-subscribers of the journal. Early publication online options are also common, under which the version of record of an article is posted online before appearing in a journal issue.

Focused on education and the learning process in management, the frequently cited and well respected *Academy of Management Learning & Education* presents theory, models, research, critique, dialogues, and retrospectives that address the learning process and enhance the practice of education in the management disciplines. Each issue comprises four sections: "Research & Reviews"; "Essays, Dialogues, & Interviews (EDI)"; "Exemplary Contributions"; and "Books & Resource Reviews." The peer-reviewed articles found in the "Research & Reviews" section contain theoretical models and reviews, quantitative and qualitative research, and literature reviews. The "EDI" section contains original essays or critiques of trends or issues in teaching, learning, and management education, dialogues that respond to previously published research, and interviews with academic, business, and thought leaders. The "Exemplary Contributions" section contains invited papers from prominent scholars and practitioners. "Books & Resource Reviews" covers materials relevant to individual learning and management education, including books, videos, simulations, and exercises. Article topics range from group and individual learning behaviors to leadership development, to social entrepreneurship education. These interdisciplinary articles would be of interest to scholars, academic educators, deans, directors, and administrators as well as policy-makers, practitioners, and consultants involved in management training and development in the public and private sectors. Published quarterly, this title is essential for academic libraries with business programs and for corporate collections interested in training and development. URL: <http://aom.org/AMLE/>

The need to keep abreast of new knowledge in the specialized sub-fields of management is important. The mission of *Academy of Management Perspectives* is to "synthesize and translate theoretical and empirical evidence found in specialized sub-fields of management" for the non-specialist. The well-respected and frequently cited peer-reviewed articles, written by experts in the field, consist of 1) reviews of existing knowledge in the field, 2) integration of theories and empirical evidence to present new ideas with provocative perspectives, and 3) integration of management theory and research with advances in other disciplines. The arrangement of articles within the publication follows two formats: a thematic format in the "Symposium" section and individual articles in the "Articles" section, both with well documented lists of references for further consultation. Articles are written for other academics, executives, consultants, and students, and their language is accessible to nonspecialists in the field. Published quarterly, this journal is essential for academic, corporate, and larger public libraries. URL: <http://aom.org/amp/>

The preeminent, highly cited, well-respected *Academy of Management Review* published by the Academy of Management features peer-reviewed, theorybased conceptual papers that advance the understanding of management and organizations. Topics in the "Articles" section challenge conventional wisdom of organizations and their roles in society. The "Dialogue" section responds to previously published research. The recently expanded AMR book reviews section, "What Inspires the Academy: Book Reviews and Beyond," features bibliographical essays by leading academic scholars and scholar-practitioners. Several recent essays focused on how books and the arts inspired the authors' scholarship; one example examined the contributions of the late author and essayist David Foster Wallace to management studies. This quarterly journal is essential for all academic libraries recommended for large public libraries. URL: <http://aom.org/amr/>

3527. *Administrative Science Quarterly*. [ISSN: 0001-8392] 1956. q. USD 84. Ed(s): Gerald F Davis. Sage Publications, Inc., 2455 Teller Rd, Thousand Oaks, CA 91320; info@sagepub.com; <http://www.sagepub.com>.

Published on behalf of the Samuel Curtis Johnson Graduate School of Management at Cornell University, the highly ranked and frequently cited *Administrative Science Quarterly* makes available empirical investigations and theoretical analysis in the social processes of administration. The peer-reviewed research papers seek to “advance the understanding of management, organizations, and organizing” of teams, organizations, government agencies, and markets. Interdisciplinary in nature, the papers incorporate research from organizational behavior, sociology, psychology, economics, and public policy. The journal publishes new and evolving work from the best dissertations, as well as the work of established scholars. The quarterly publication also provides in-depth book reviews for notable books in the field, as well as a convenient listing of recently published books in the field for current awareness. Represented in a large number of business, academic, and general indexing and abstracting services, this title is highly recommended for academic libraries and large public libraries. Published in collaboration with the British Academy of Management, the *British Journal of Management* features often-cited, peer-reviewed articles of a multi-disciplinary, interdisciplinary, and international nature that are intended to make a positive social impact. Written by scholars from around the globe, articles in the journal are insightful, empirical, and methodological, on topics such as organizational behavior, equality, diversity and inclusion, business ethics, strategic management, operations management, R&D management, and public sector management. Each issue of the quarterly journal contains seven or eight original articles, about 6,000 words in length, which are targeted to academics and executives interested in cutting-edge, evidence-based management research. Among recent article topics are the impact of transformational leadership on organizational citizenship behaviors; the relationship between online retailers' reputation and product returns; and changing business models and employee representation in the airline industry. A “Methodology Corner” section in each issue presents shorter articles on research methods, for example, response rates in business and management research; subjective measures in organizational performance research; and constructing hermeneutic designs for qualitative management research. The *British Journal of Management* does not include conceptual and review papers, except in its special issues. Referenced extensively in academic indexing and abstracting services, this publication is highly recommended for academic libraries with a business program. The *International Journal of Organizational Analysis* (print ISSN: 1934-8835, online ISSN: 1758-8561) features peer-reviewed, critical analyses of the theory of organization and its practical impact in business and society. This title is published quarterly with an occasional special issue on a focused research topic; a recent special issue's theme was leading for organizational excellence in the Middle East. Each issue contains eight or nine academic articles written by international scholars and researchers that draw from organizational theory, organizational behavior, organizational development, organizational learning, and human resource management, as well as strategic and change management. A review of recent issues finds topics including connections between organizational climate and well-being at work; organizational citizenship behavior; organizational emotional intelligence; and demographic influences on employee trust towards managers. Article types include research, conceptual, literature reviews, and case studies, many of which focus on a particular country or region of the world. With content written for academic scholars, practitioners, and students, this journal is recommended for academic libraries that support business studies, large public libraries that support an active business community, and corporate libraries interested in organizational analysis. Management Science (print ISSN: 0025-1909, online ISSN: 1526-5501) is one of 13 journals published by the Institute for Operations Research and the Management Sciences (INFORMS), the professional society for operations research, management sciences, and business analytics professionals. *Management Science* publishes scholarly, peer-reviewed theoretical, computational, and empirical research on managerial issues in diverse organizations, such as for-profit and nonprofit firms, private and public-sector institutions, and formal and informal networks of individuals. The articles use interdisciplinary tools from fields such as operational research, management sciences, mathematics, statistics, industrial engineering, psychology, sociology, and political science. Management topics explored include business strategy, decision analysis, entrepreneurship, product development, social networks, and supply chains. The in-depth, detailed articles with extensive references, written by academic authors and practitioners, are important sources for other academics, students, and management executives interested in theory and empirical research. To support the scientific process, *Management Science* encourages (but does not require) the disclosure of data associated with the manuscripts published. *Management Science* is essential for academic libraries that support either business or industrial engineering programs. Published quarterly by the Institute for Operations Research and the Management Sciences (INFORMS), *Manufacturing & Service Operations Management (M&SOM)* (print ISSN: 1523-4614, online ISSN: 1526-5498) is the premier journal for the operations-management research community. It publishes a wide range of research that focuses on the production and operations management of goods and services, with topics including control and improvement, operational decision-making, operations strategy, process design, and supply chain coordination. Written by academic researchers and practitioners, *M&SOM's* articles help to solve operations management (OM) problems and explore the control, planning, design, and improvement of these OM processes. Each issue includes seven to 13 research articles, and most issues include a regular "OM Forum" section that offers invited essays on OM research and managerial practice. One or more issues per year focus on a special theme; recent examples include practice-focused research; value-chain innovations in developing economies; and the interface of finance, operations, and risk management. Academic researchers and practitioners responsible for operation management, as well as graduate students in business schools and industrial engineering, are the audience for *M&SOM*. Highly recommended for academic libraries that support business and engineering studies, and for corporate libraries interested in the improvement of OM processes. Organization examines organizations from a wide range of perspectives, addressing significant current and emergent theoretical, meta-theoretical, and substantive developments in the field of organizational studies. It presents peerreviewed papers and essays that tie together contemporary social problems and the study of organizing. The articles are theory-oriented, international in scope, provocative, imaginative and critical, and interdisciplinary. Each issue contains five to eight articles plus two to four book reviews, with occasional editorials, opinion papers written to challenge contemporary orthodoxies, and review essays. One or two issues per year focus on a specific theme; recent special topics include "Spaces and Places of Remembering and Commemoration," "Animals and Organization," and "Organizations and Their Consumers: Bridging Work and Consumption." As the official publication of the Eastern Academy of Management, an affiliate of the Academy of Management, the *Organization Management Journal* publishes peer-reviewed articles that intersect theory and practice, address strategies for effective teaching and learning, and “represent the early stages of theorizing about management and organizing in unique and perceptive ways.” The journal is organized into six distinct sections: “Current Empirical Research,” “Emerging Conceptual Scholarship,” “Teaching & Learning,” “Linking Theory & Practice,” “First Person Research,” and “Reviews & Research of Note.” Each issue provides five to seven peer-reviewed articles on a common theme written by scholars, practitioners, and doctoral students. While the mix of article types is different for each issue, the common theme of the issue is explored through different modes of writing and creating knowledge, including empirical research articles, conceptual articles, analytical essays, case studies, white papers, conference papers, and book reviews. A review of recent issues shows a range of topics, including leader/teacher credibility and gender bias, risk taking, organizational responses to sexual harassment, and work–life balance. The “Teaching and Learning” section in each issue provides several articles focused on effective strategies for teaching organizational management topics. One or two book reviews round out most issues. Academic researchers and instructors, as well as business students, will find relevant content in this journal. Highly recommended for academic libraries that support all business management programs. URL: www.tandfonline.com/toc/uomj20/current

SAM Advanced Management Journal (print ISSN: 0749-7075, online ISSN: 0567-977X) is published quarterly by the Society for Advancement of Management at Texas A&M University-Corpus Christi. The publication, refereed by an editorial review board, is designed "to provide general managers with knowledge to communicate with specialists without being specialists themselves." Each issue contains five or six articles of medium length, written by academics and business professionals. They cover a variety of management topics, including human resource management and organizational behavior, strategic management, international management, planning, ethics, productivity improvement, time management, health-care management, nonprofit management, sustainability, and computer use in managerial decisions. The emphasis is on new

concepts, innovative ideas, and well-written articles that are easy for practicing managers to understand. The audience “is interested in knowing what current terms mean, what new management concepts can do (including their limitations), how to apply them to a particular situation, and what questions should be asked of experts who implement them.” This is a recommended source for corporate libraries and academic libraries that support business programs at all levels.
