ASI 345 - Week 8

Maggie

Week 8 focused on power structures in a city, characteristics of each structure and when they are most effective. Janet Bednarek used the first half of the class to review the reading *Power in the City* and break down the different structures. Dick Ferguson then spent the remainder of the time applying the structures and roles to a current issue in Dayton: low-dam removal. This time was also used to discuss the Fitz Center's model for community building and leadership.
