River Day in Sidney

Bethany Renner

The River Stewards traveled to Sidney for a River Day with students from Kindergarten to 3rd grader to talk about water safety and recreation on the rivers or other bodies of water. The field day event took place at Tawawa park and River Stewards took students out in canoes to put safety skills into action, while enjoying being outside. For many of the students it was their first time in a boat. The Rivers Institute was highlighted in an article in the Sidney Daily News.

The experience with the students, especially at their young age was a great addition to our educational outreach efforts! Seeing students, especially at their age, making connections to the water surrounding them was amazing. It is also so beneficial to continue to gain a regional perspective of our efforts surrounding the rivers.

Sorry, we are unable to access the article on-line, so it is pictured below.
