UD In the News July 17-21

University of Dayton researchers shared their expertise on law, politics and technology with national audiences during the week of July 17-21.

Significant news coverage included law professor Thaddeus Hoffmeister on the popular radio program *The Academic Minute*, a platform for professors from top universities across the country to share “groundbreaking research and how that research helps us understand and solve the big problems that matter to us all.” Produced by WAMC/Northeast Public Radio, it airs in nearly 70 markets across the country. *Inside Higher Ed*, a leading website on higher education news, also shares the program daily.

Also this week, *Campus Rec Magazine*, a leading national business resource for college and university recreation centers, carried a feature story about UD's innovative and successful program to increase student physical activity.
