Basia Irland Impacts River Stewards

In a wonderful collaboration between the University of Dayton and Antioch College, the River Stewards have been given the opportunity to work with Basia Irland. Her ice books are not only a beautiful demonstration of eco-art, but have helped the Stewards consider the health of our rivers and connect to the sheer beauty of being in nature.

See the link to Susan Byrnes' story on Public Radio WYSO.

This Friday, September 14th will be an ice book launch using native plant seeds. You may join in a cycle or walk from ArtStreet at 3pm to the Vietnam Veterans Memorial Park at Stewart and Patterson. At 4pm the ice books will be launched into the river.
