Photovoltaic Solar Panel System
Engineering Technology: Andy Brewer, Chigozie Ezenagu, Billy Schwarze, Yolanda Xu
Advisor: Professor Philip Doepker, Professor Rebecca Blust

What are we doing?

- We are managing the installation of a solar PV system adjacent to the RecPlex center for the University of Dayton. This will include inventory of components, developing drawings, scheduling contractors, and monitoring the output of the system. This project is being done along with the help of Melink Corporation, T.M.I., and Bowser Morner.

- This project will be completed to serve as an educational device for students and faculty to learn about the advantages of renewable energy.
