

Developing A Safe Learning Environment Conducive to Comfort and Success

Olivia G. Thomakos, Karin E. Forsthoefel, Sara M. Borchers, Victoria R. Schoen

Advised by Dr. Kathryn A. Kinnucan-Welsch, EdD. & Mrs. Susan M. Ferguson M.S.

Color and Light in the Classroom

Wall Color

- The psychological benefits of colored classroom walls
- Physical benefits of colored walls
- Other positive classroom outcomes
- Specific color effects dependent on student age and physical environment

Classroom Light

- Natural light as the most beneficial light
- Different hues of light beneficial for student behavior and work

Types of Support Needed for Students Battling Cancer

- Pros and cons of alternative schooling during treatment
- Importance of informing the child's classmates and the school personnel
- Communication between teacher and student as well as between teacher and parents
- Social support
- Emotional support

Inclusive and Segregated Classroom Environments for Students with Autism

Advantages of segregated classrooms:

- Relief from social stress

Disadvantages of segregated classrooms:

- Take students away from a social environment that emulates the social schemas of the world

Advantages of inclusive classrooms:

- Opportunities for the facilitation of social interaction and development

Disadvantages of inclusive classrooms:

- Entails unpredictability and chaos, loneliness, and depression

The Benefits of Differentiated Instruction

Benefits Students:

- Meets diverse learning needs
- Learn in various ways
- Improves student achievement

Benefits Teachers:

- Master different techniques
- Achieve full efficacy in their teaching
