## Introduction

The goal of this work is to formulate spatial mechanism analysis and design problems via a method suited to employ the tools of numerical algebraic geometry. This work illustrates their use by analyzing the spatial RCCC and RRRCC linkages. The specialization to pure rotations using special unitary matrices is also presented and used in the analysis of the spherical four-bar and Watt I linkages. The motion curves generated in this work are validated by comparison to other published work.

### RCCC Linkage

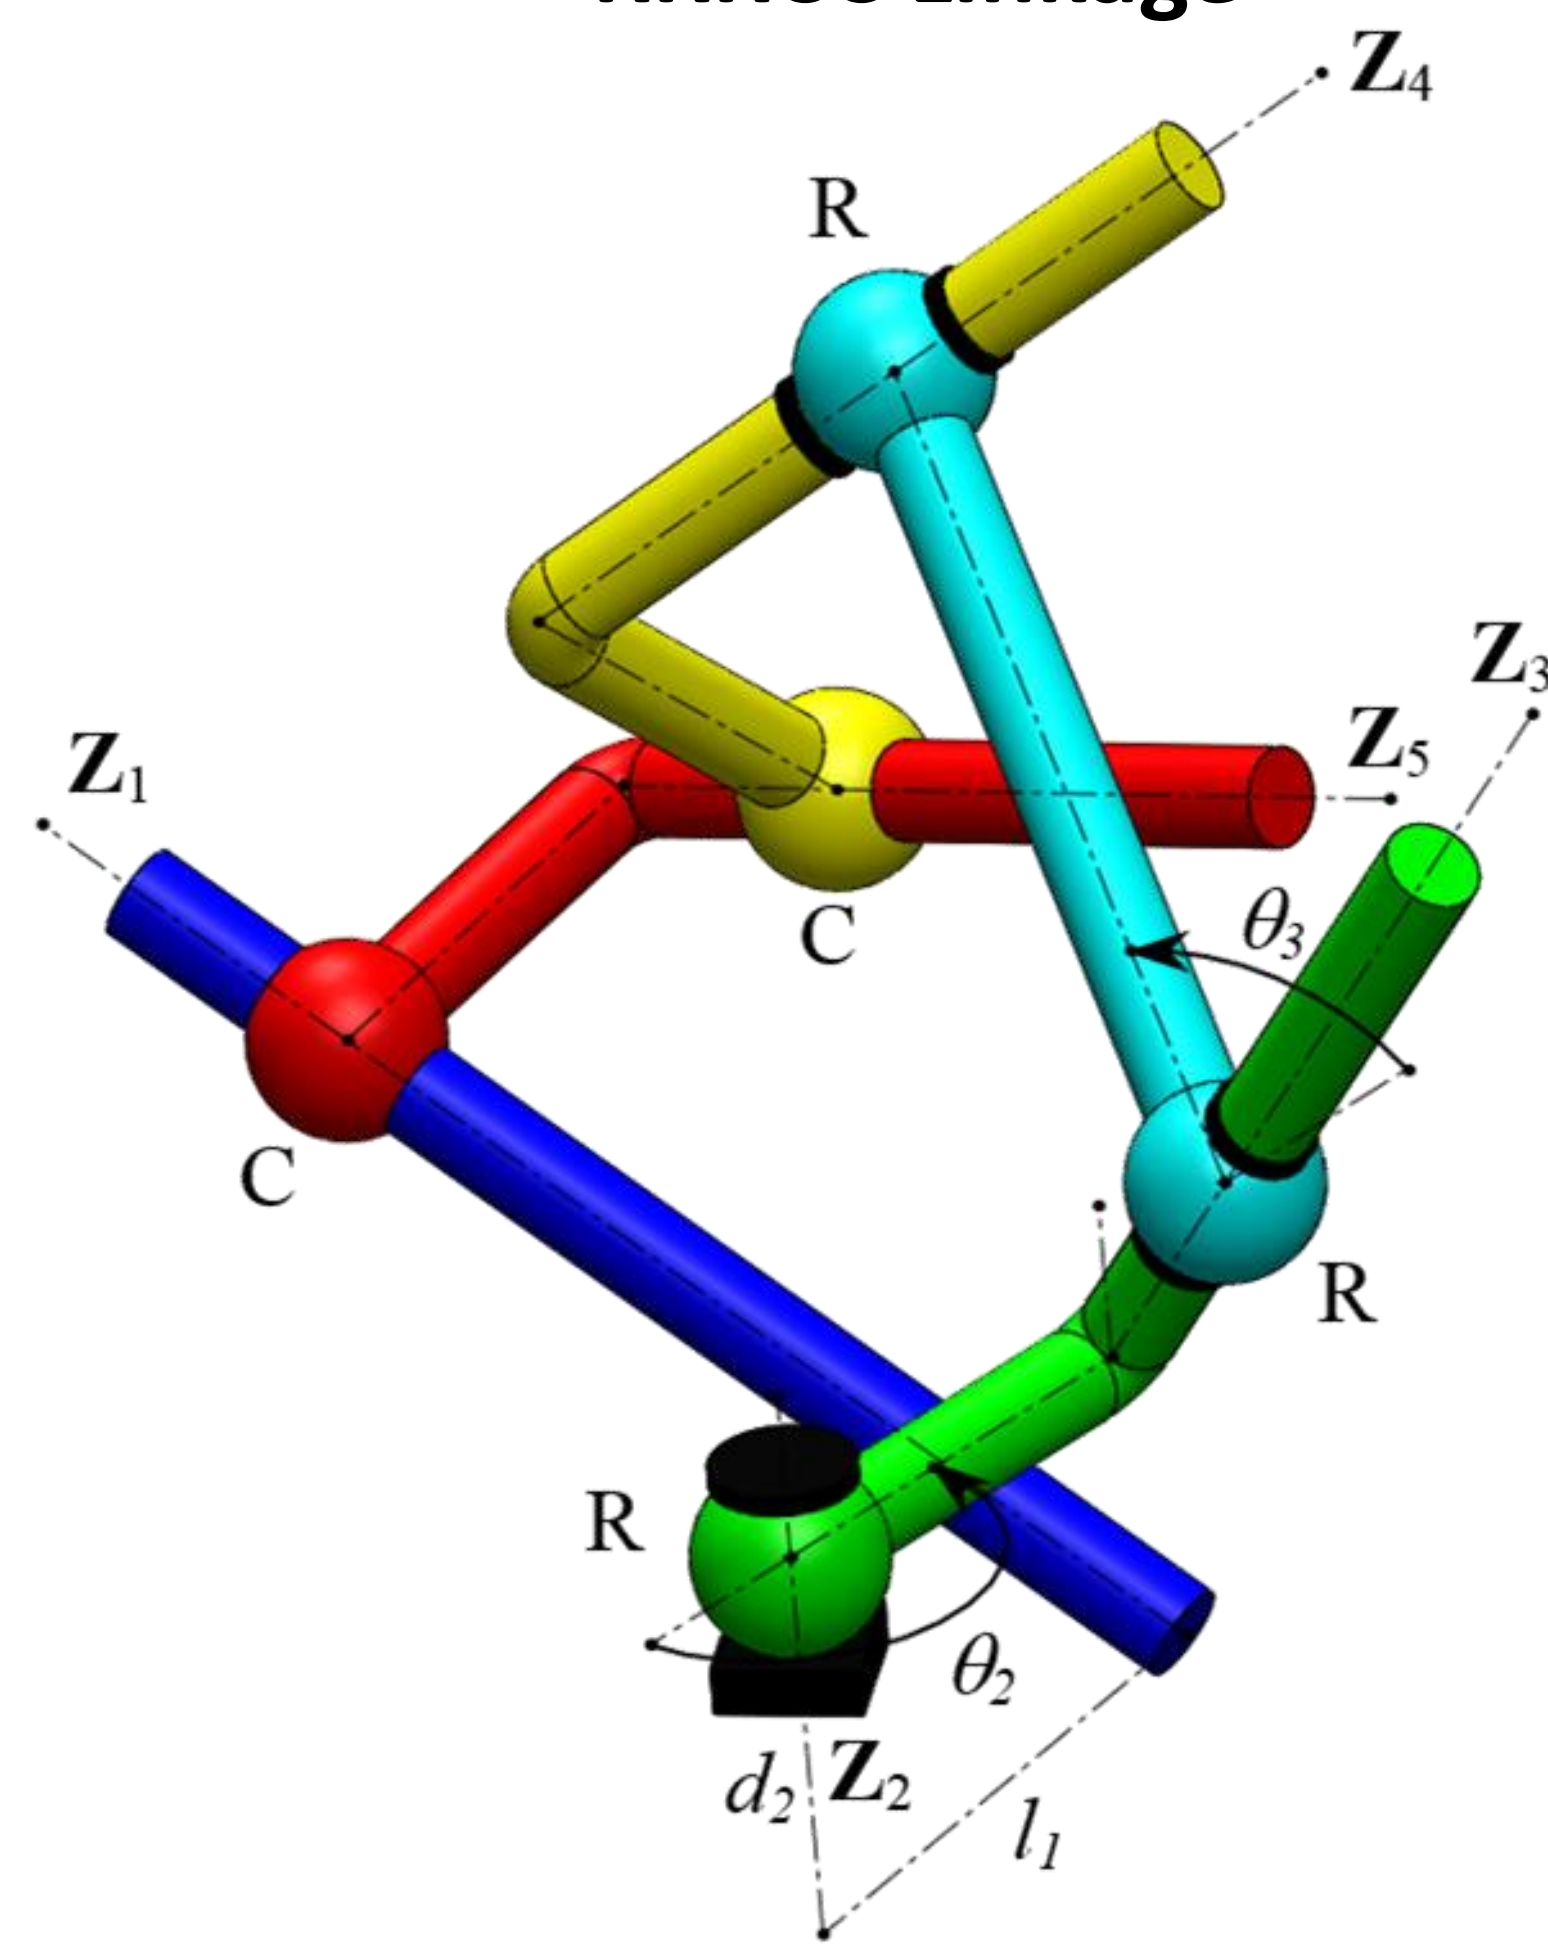

RCCC linkage schematic diagram

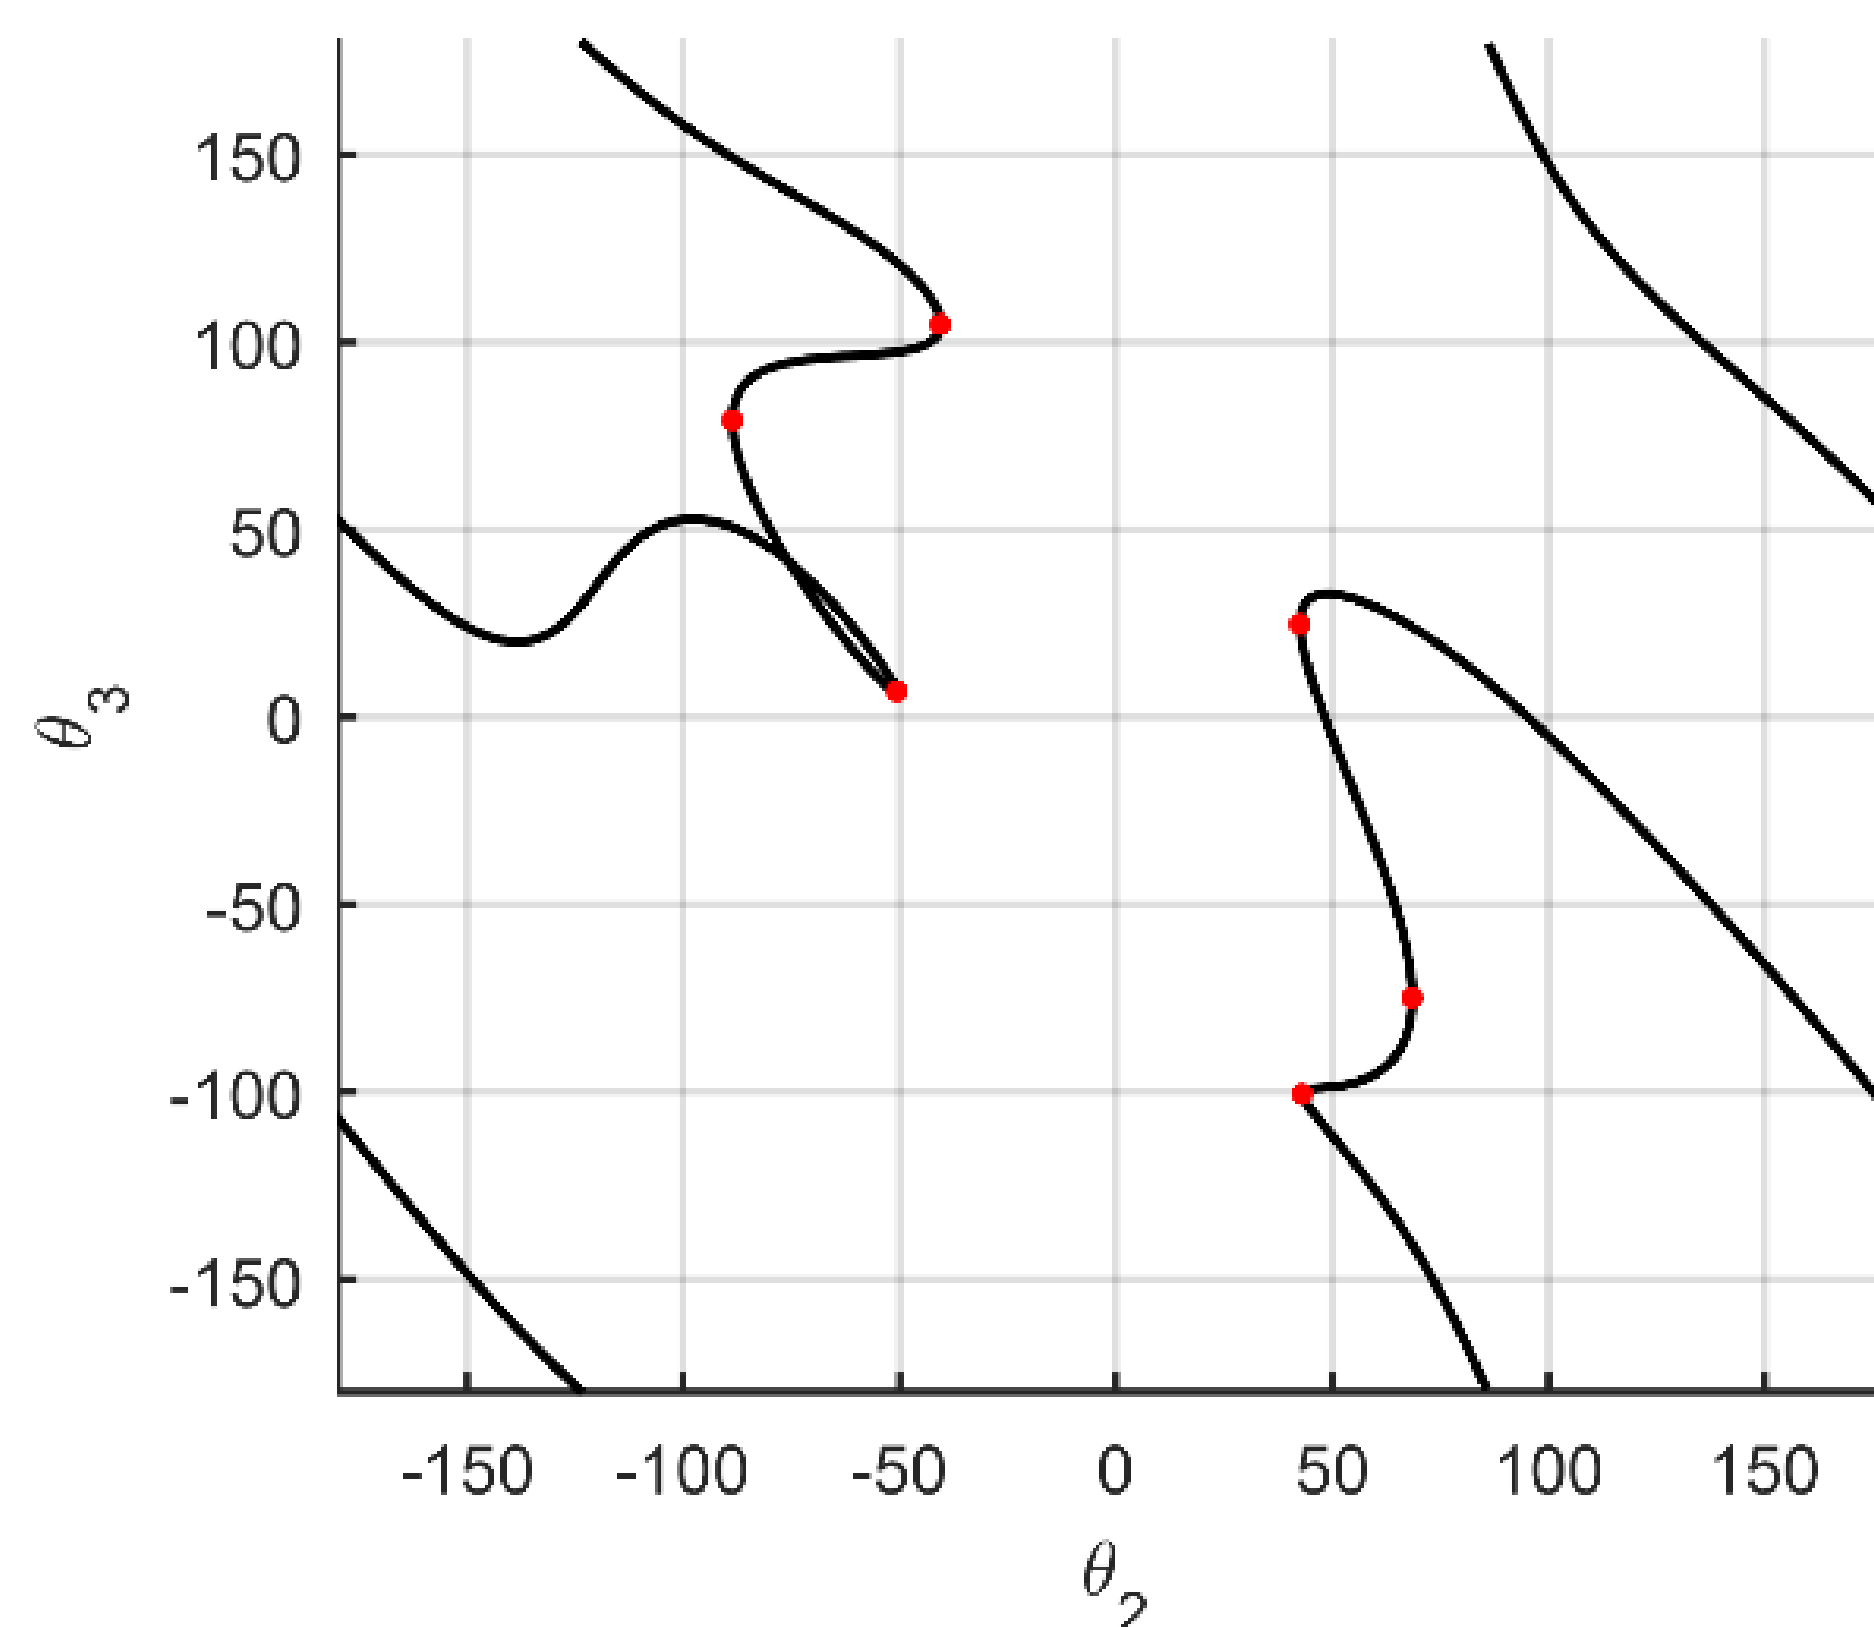

Motion curve for RCCC projected onto  $\theta_1$ - $d_2$

### RRRCC Linkage

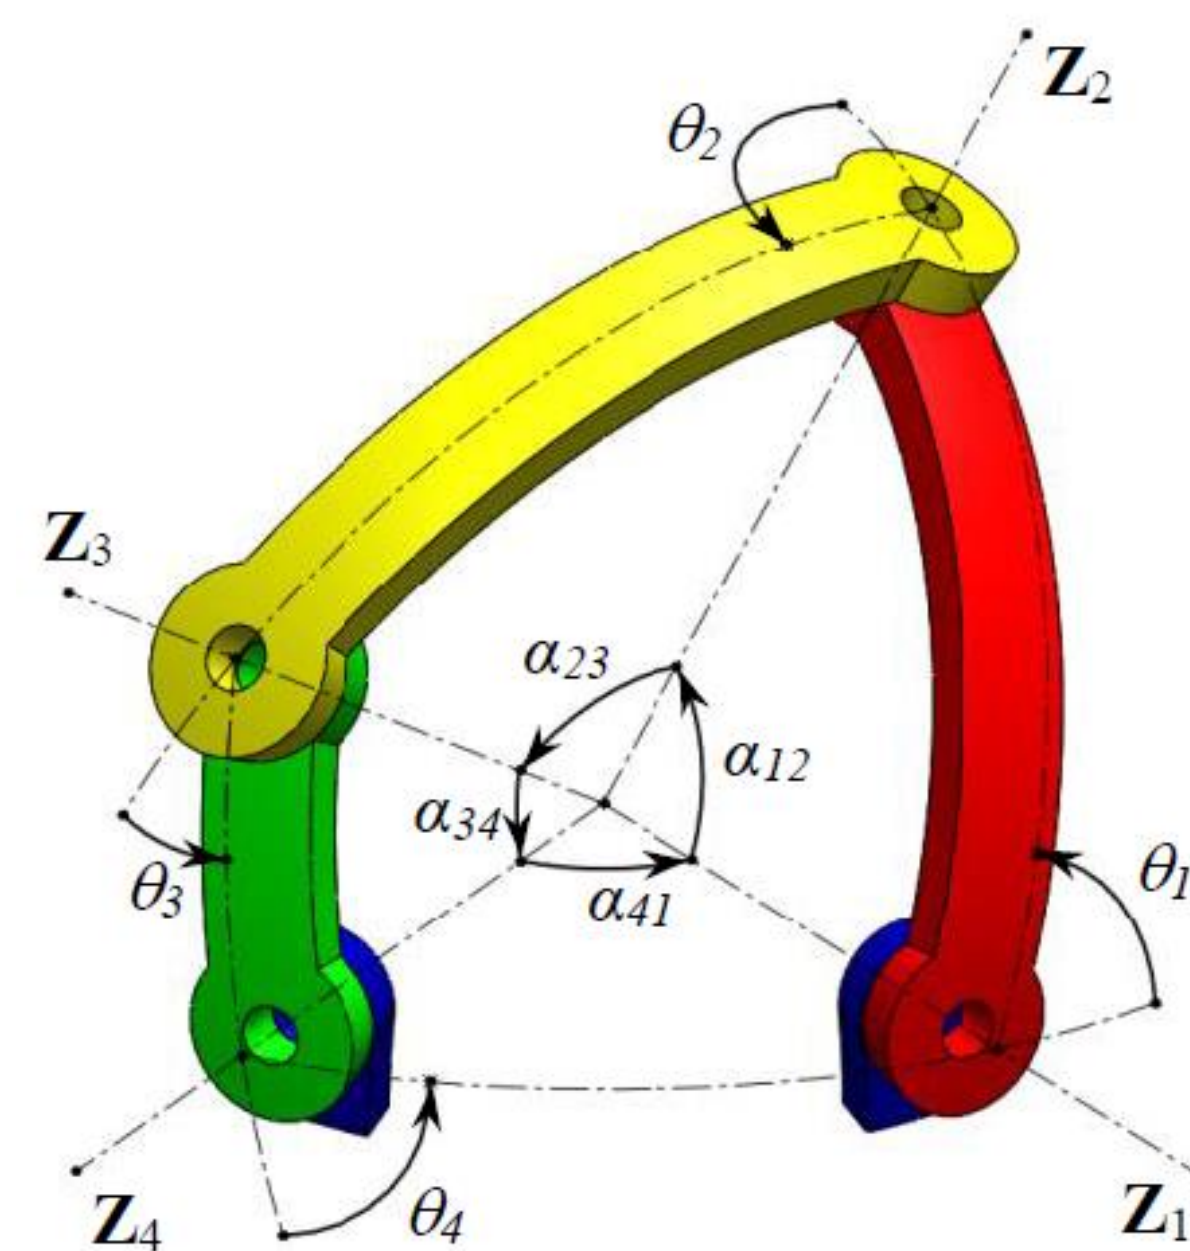

RRRCC schematic diagram

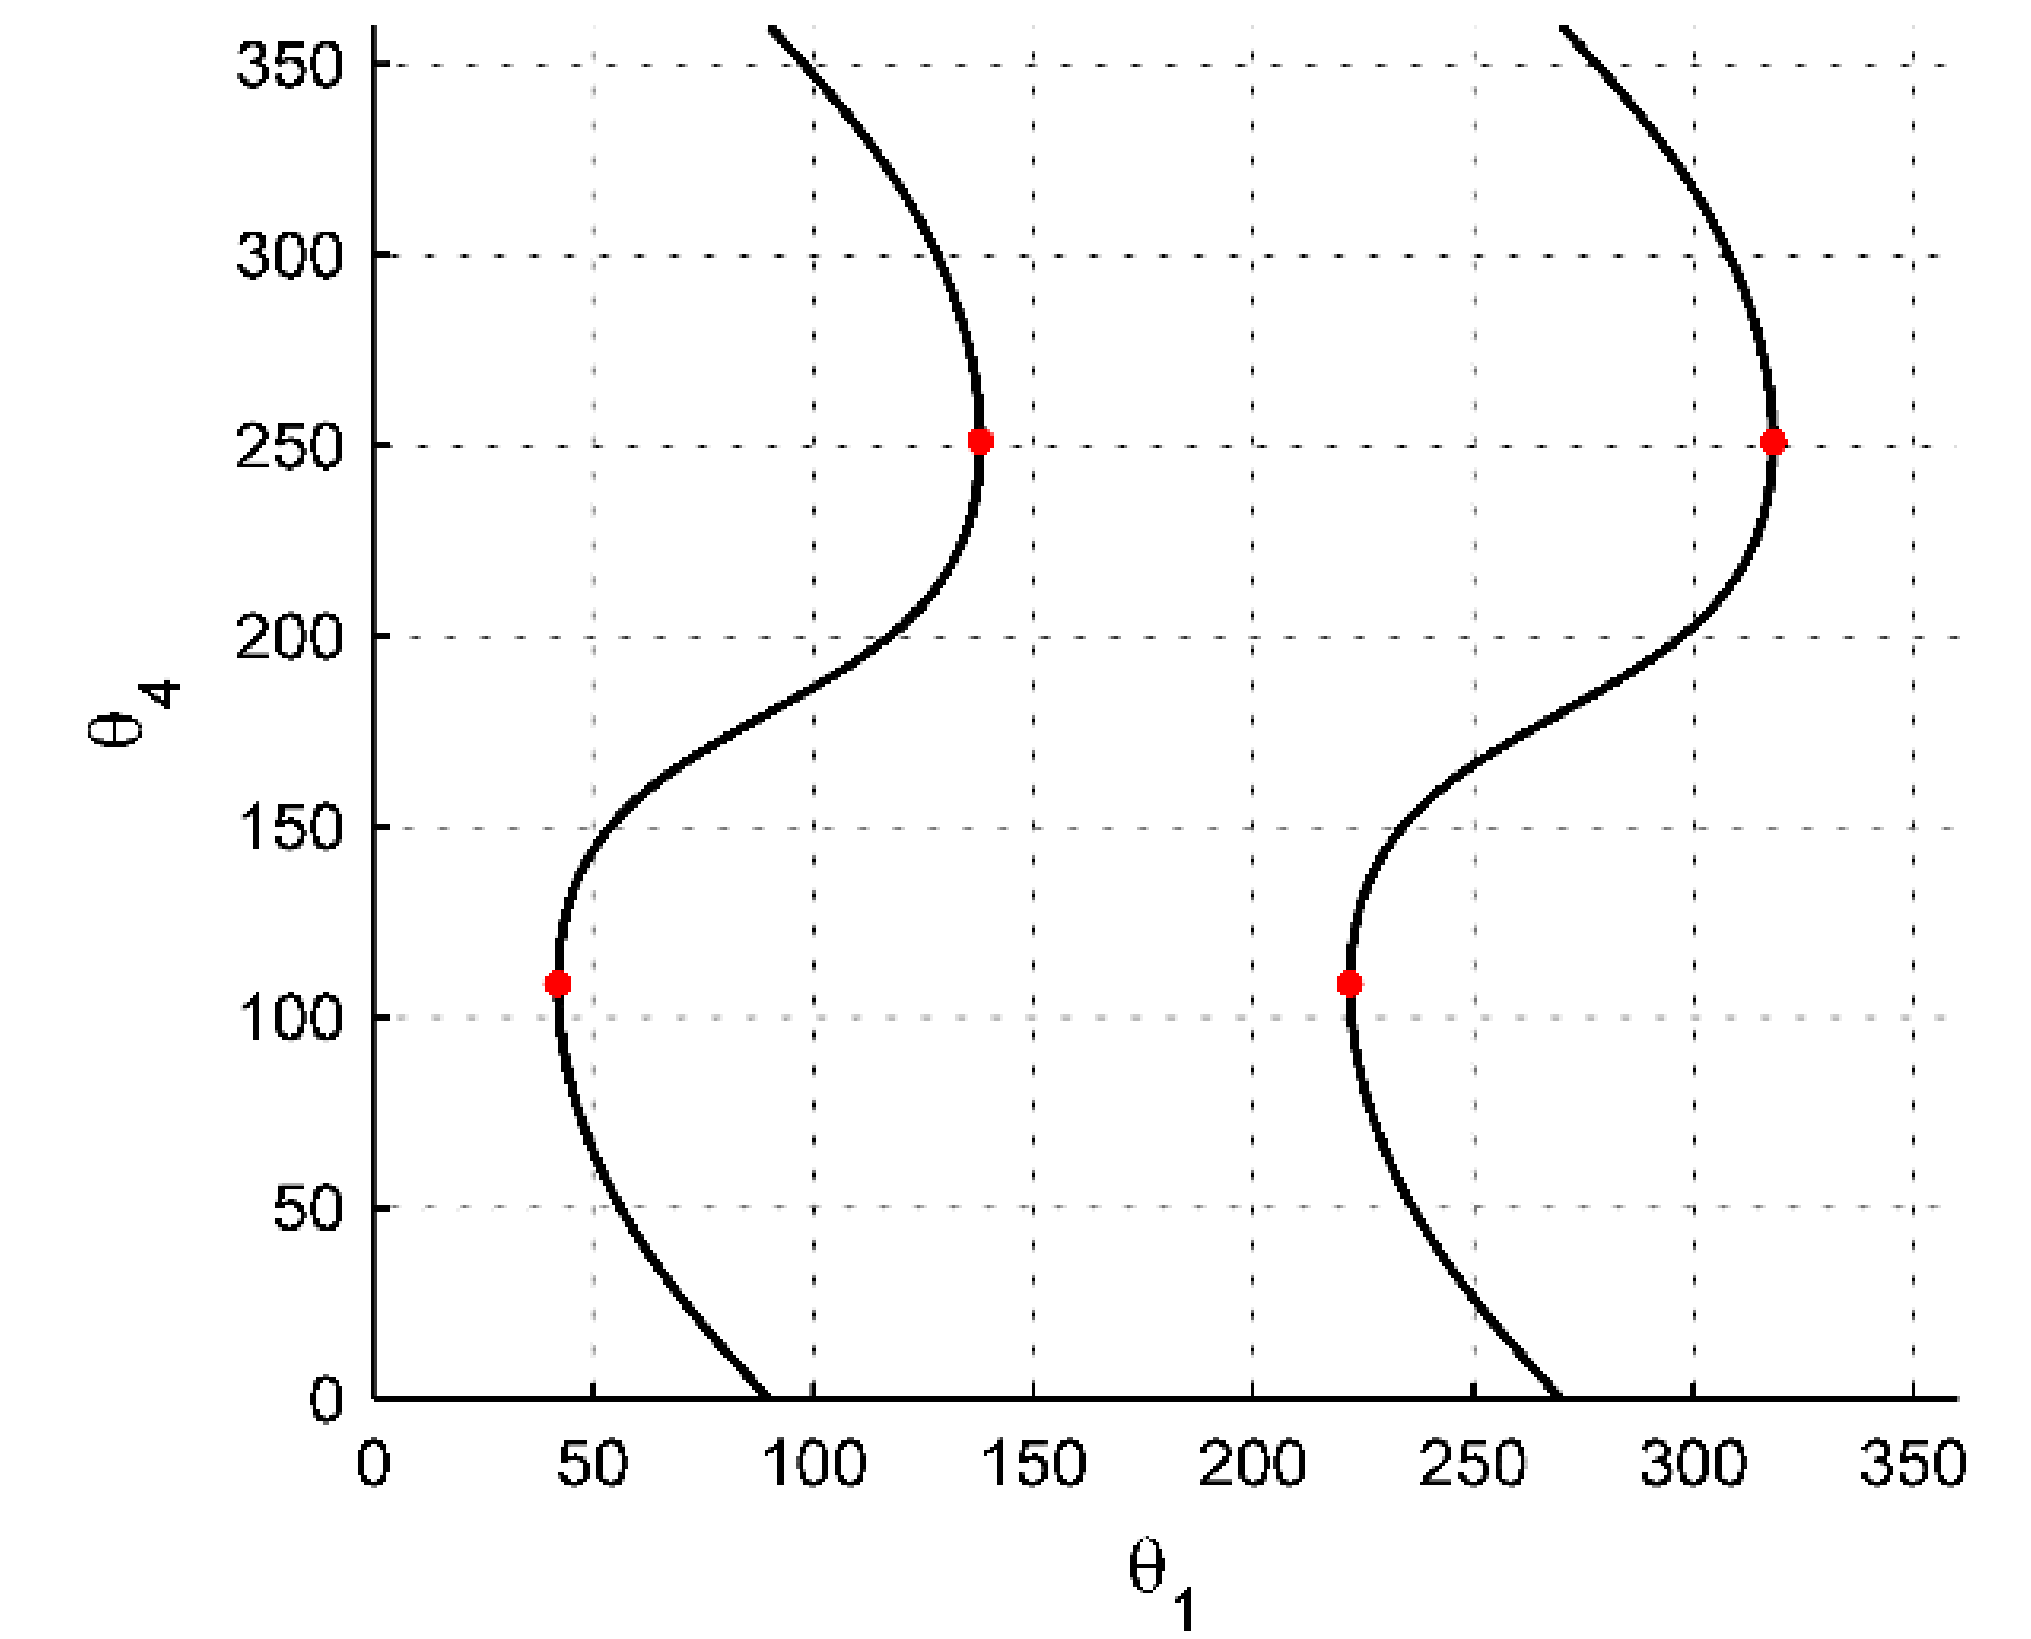

Motion curve for the RRRCC projected onto  $\theta_2$ - $\theta_3$

### Spherical Four-Bar Linkage

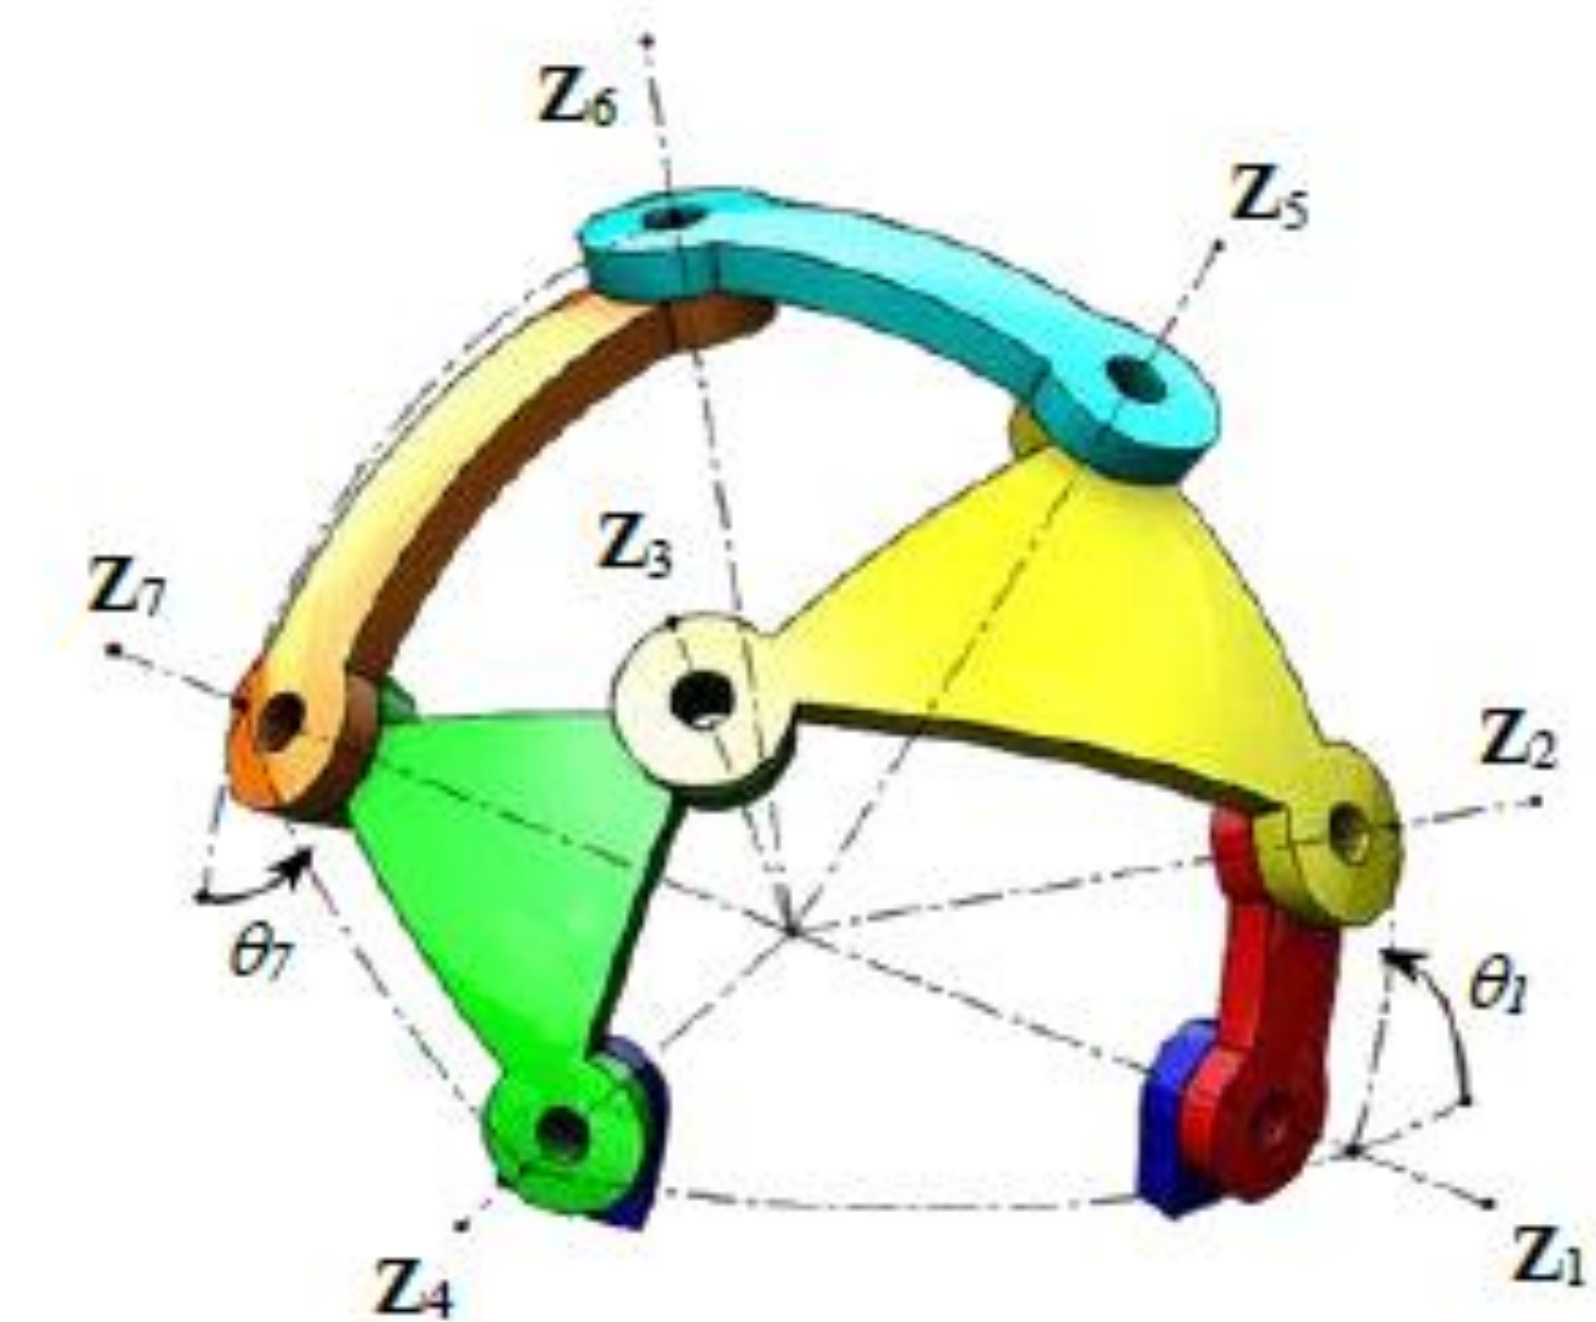

Spherical four-bar linkage schematic diagram

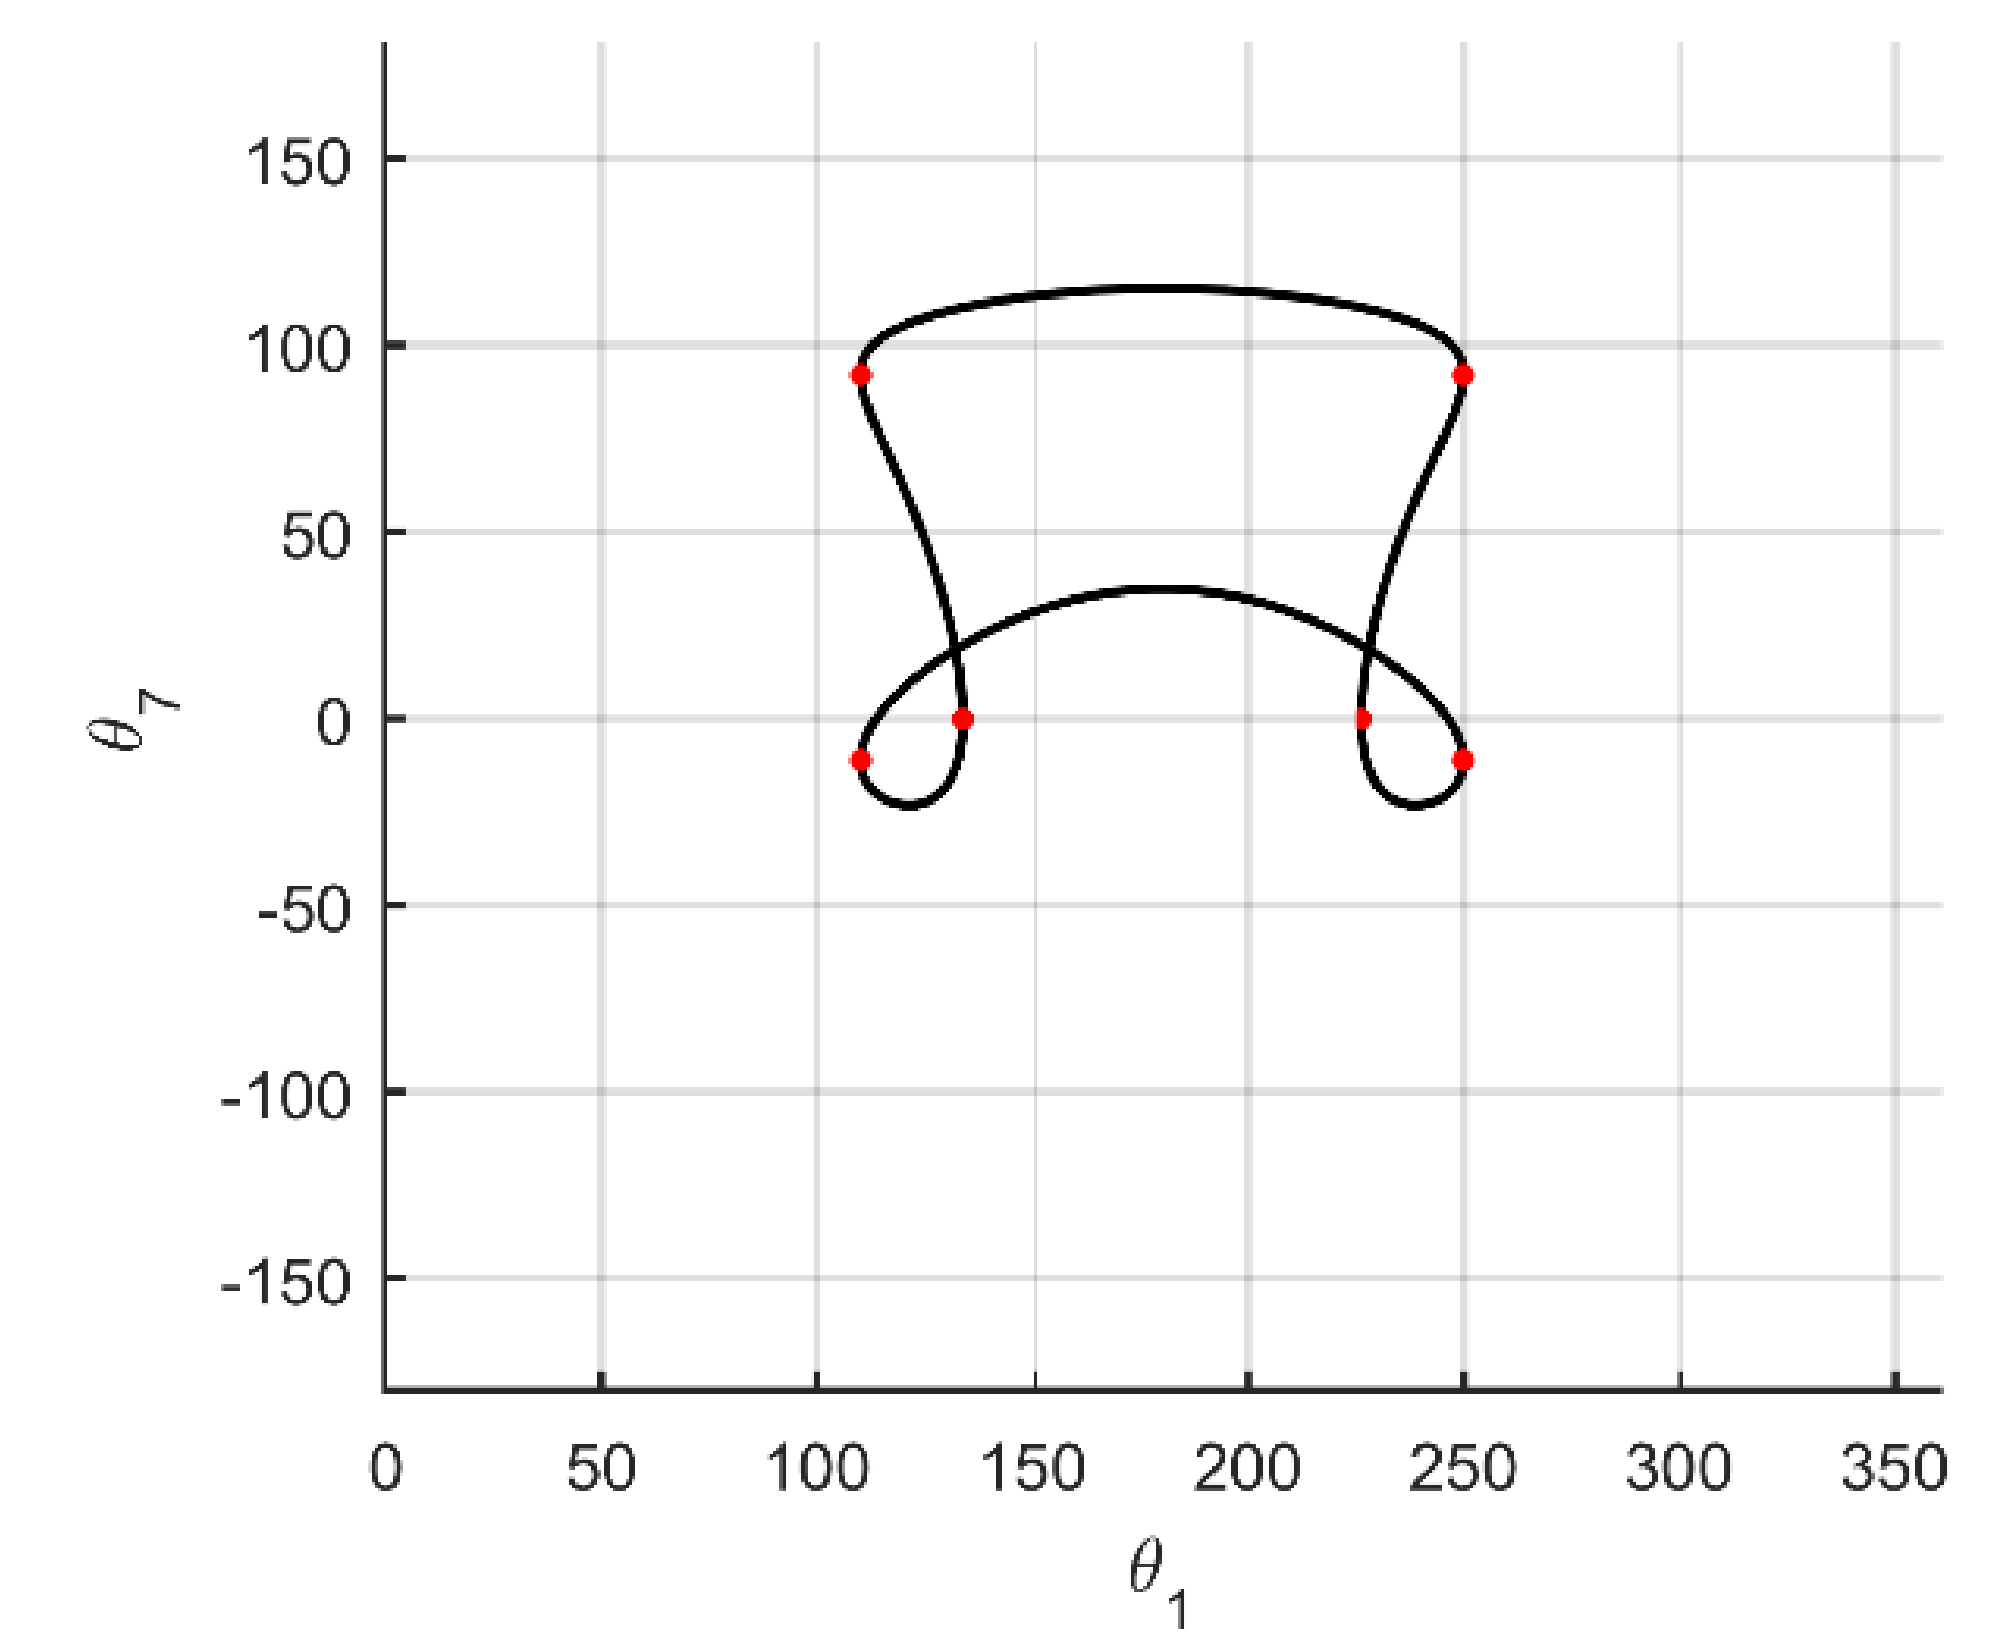

Motion curve for spherical four-bar projected onto  $\theta_1$ - $\theta_4$

### Spherical Watt I Linkage

Spherical Watt I linkage schematic diagram

Motion curve for spherical Watt I projected onto  $\theta_1$ - $\theta_7$
