

## Motivation

## Design Process

The pervasive approach will take the GPS and datetime to map the location and activity

## Final Design Direction

## Design Ideas

Survey from people conducted for design implementation

The model will work as per principle of Just in Time (JIT) Intervention.

Syncs the user inputs, analyzes the data extracted from the user, manipulates for the pervasiveness.

The unique combination of GPS and time allowing the end-user to track their health activities

The UI was proposed taking survey from different people.
