The GHR Foundry Division of the Dayton Malleable Iron Company announced today that it will award two full tuition scholarships to University of Dayton students in school year 1966-67. Preference will be given to junior and senior students in Mechanical, Electrical, and Industrial Engineering who are Daytonians or have a decided Dayton orientation.

The GHR Foundry first established its scholarship in the spring of 1965. The first winner was William A. Fuller, an Electrical Engineering student who will graduate this April.

The winners of these scholarships will be chosen through the joint efforts of representatives of the GHR Foundry and the University of Dayton. Officials of the Foundry will interview each of the nominees selected by the University. Interested students should submit an application, available in the Office of Student Aid, by April 1.
