Having trouble understanding the new mathematics being taught today?

Well, the University of Dayton's Continuing Education Division is starting a course this week designed to help you with that problem and one of the country's leading experts in the field will be teaching it.

"Enjoying the New Mathematics" will begin Wednesday, February 23 at 7:30 p.m. in the Kennedy Union, room 310, on the U. D. Campus. Dr. John R. O'Donnell, well known Professor of Education at U. D. and a man who believes education in general and mathematics in particular should be enjoyed will be the instructor.

The course is designed for teachers, parents, and the intellectually curious who are interested in discovering the meaning of the revolutionary developments in the world of mathematics.

The program will be taught each Wednesday for eight weeks from 7:30 - 9:15 p.m.
