DAYTON, Ohio, June 16, 1967 --- The Chemistry Department of the University of Dayton has been awarded a $7,580 grant by the National Science Foundation to conduct an In Service Institute in Chemistry for high school teachers, during the academic year 1967-68.

The National Science Foundation grants are designed to provide secondary teachers of science and mathematics with the opportunity to obtain supplemental training on a part-time basis so that teachers may participate while still carrying on their classroom duties.

The Foundation annually sponsors more than 1,000 such projects to strengthen the subject-matter background of teachers in these fields at various academic levels.

The U. D. Institute will run from September 12 to April 16 with one course and seminar given each term. Participants may earn six semester hours of graduate credit which can be applied to the degree of Master of Science in Education or they may audit on a non-credit basis.

Thirty participants will take part in the Institute. U.D. and Bowling Green University are the only two schools in Ohio offering NSF Chemistry Institutes.

Staff for the Institute is S. L. Eveslage, Ph.D., Professor of Chemistry and Institute Director, and John H. Meiser, Ph.D., Assistant Professor of Chemistry.
