DAYTON, Ohio, July 10, 1969 --- The Dayton Tire and Rubber Company has awarded a two-year $10,000 grant to the University of Dayton for its six-story, $7.0 million engineering-research building, Rev. Raymond A. Roesch, S.M., University President, announced today.

The first installment of $5,000 was presented to the University by Mr. A. H. Greber, Vice President of the Dayton Tire and Rubber Company. The second installment will be paid in 1970. The company has awarded UD $21,200 since the 1962 community-wide capital fund campaign. This includes the 1970 gift.

In expressing his appreciation to Mr. Greber, Father Roesch stressed the importance of industrial support of the University's continuing effort to provide quality research and engineering education.

The $7.0 million cost of the engineering-research building is a part of the $43.0 million five-year growth program announced by Father Roesch in the fall of 1967. The development effort began early in 1968. Three other buildings, $2.5 million women's residence hall, $4.0 million sports arena, and $4.8 million library, are under construction as a part of the five-year plan.
