SPECIAL TO: Kettering-Oakwood Times

DAYTON, Ohio, June 18, 1971 --- Gary Lee Jones, a 1968 graduate of West Carrollton High School, is a member of a team of student scientists awarded a \$6,404 National Science Foundation grant for environmental study at the University of Dayton. Mr. Jones is the son of Mr. and Mrs. Marvin L. Jones, 47777 Lamme Road, Dayton. Mr. Jones is Chief Engineer at Dayton Tire and Rubber Company.

The NSF grant is one of 97 selected from 560 proposals made to the federal group's new Student-Originated Studies (SOS) program by students from colleges and universities throughout the country.

The UD research is an effort to study the damage to buckwheat plants by oxident pollution. The group is particularly studying ozone and titanium dioxide pollutants, using Butylated Hydroxy Toluene (BHT) as a corrective agent. The team of six will work from June 21 through July 30. The group includes four physics, one chemistry and one pre-medical students. All will be seniors in September.
