Six Special Sessions Programs to Come to the University of Dayton
DAYTON, Ohio, October 8, 1971 -- Successful marital relationships, sound business management, human relations and solid materials are the subject of six Special Sessions Department programs at the University of Dayton starting this month.

Two programs involving husband-wife relationships are beginning this week. Rev. Norbert Burns, S.M., of the University, who has been counseling married couples for more than 25 years, will conduct his marriage course principally on married love while Dr. Charles Scheidler, Chief Psychologist, and other UD professors will lecture in the "Psychology for Married Couples" course. Miss Eleanor Anderson, also a staff psychologist; Mr. John Riley, Director of Veterans Counseling; Joseph Rosa of the Psychology Department and George Biersack, Chairman, Department of Communication Arts, will assist Dr. Scheidler.

The psychology course, subtitled "The Caring Relationship II" will begin Wednesday, October 13, at 7:30 P.M. in Miriam Hall 120 and continue for 10 Wednesdays. The program content will include barriers to communication, communication in the home, eyes of the beholder, caring relationship, attitudes and values, child psychology, ego involvement, and motivation.

An integral part of this short course will be the testing, interpretation and consultation phase. Individual interviews will also be a part of the program.

First course of the month is the Metallographic Interpretation, a metals engineering institute course, co-sponsored by the University and the Dayton Chapter, American Society for Metals. Dr. James Selle, Senior Research Specialist, Monsanto Research Corporation, is the instructor.

A Financial Management Seminar, sponsored by the School of Business Administration in cooperation with PDI, Executive General, of Cincinnati, will be conducted Friday, October 15, from 8:30 A.M. to 4:30 P.M. The seminar objective is directed toward improving the financial management skills and placing emphasis on the Management by Objectives philosophy and practice.

Course content includes corporate objectives in relation to financial management, performance evaluation and analysis, performance measurement, cause factors, effect factors and graphic presentation using bar pie, column, and curve charts.

Two other management courses will begin later in the month. Human Relations for First Line Supervisors will begin on Wednesday, October 20, and continued each Wednesday for eight weeks. The program starts at 7:30 P.M. each night. Course content includes basic understanding of man, development of the concept of leadership, human-organization relationships and constraints, and communications and human relations.

The final program is Problems in Supervision Seminar to start October 26 and run eight Tuesdays. The course is designed for experienced first and second-line supervisors as well as technical personnel in supervisory positions to develop supervisory skills by means of realistic but simulated situations which make it possible for students to concentrate on the improvement of supervisory methods and techniques.
