DAYTON, Ohio, February 17, 1972 — Joseph A. Racosky, a junior in Engineering, has been selected to attend a special student/businessman's conference at General Electric in Louisville, Kentucky, as the representative from the University of Dayton, Dr. Maurice Graney, Dean, School of Engineering, has announced. Mr. Racosky, son of Mr. and Mrs. Andrew Racosky, of 3 Cox Street, Johnstown, Pennsylvania, is a major in Civil Engineering at U.D., and an honor role student.

Racosky has been active in a number of organizations — the University of Dayton Chapter of the National Society of Professional Engineers, the Joint Council of Engineers at the University, the American Society of Civil Engineers, Epsilon Delta Tau, a professional-social fraternity, and Tau Nu Kappa, an engineering honor fraternity. In addition, he participated in the University's Planning for the Seventies Program, the Engineering School's Tutoring Program, and is currently working with the U.D. Urban Vehicle Design Program being sponsored nationwide by SCORE. He also is an honor student with a grade point average of 3.65 out of 4.00 for 83 semester hours of work through the fall term of the 1971-72 academic year.

The General Electric Conference is being held on February 24 and 25 in Louisville. It will include student representatives from forty schools within a 250 mile radius of Louisville, and was designed to promote better relationships between college students and industrial representatives.

Edward L. Stehle, vice president of General Electric, had this to say on the GE Project: "This special seminar, we believe, will help provide college representatives with valuable insight into the activities of one industrial firm; and it is certain to help us in General Electric, as the students share with us some of the real concerns they and their campus associates have identified."

The students attending the conference will come from various disciplines and activities. They will be provided with lodging and meals while in Louisville, as well as with travel expenses for the trip there and back.
