Two University of Dayton Graduate Courses will be offered at Lima Senior High during the First Summer Session, May 4, 1972 - June 17, 1972 under the auspices of the Lima Graduate Center. Registration will be held on Thursday, May 4, 1972 from 6:30 - 8:30 at the Senior High Faculty Dining Room. Both courses will offer three semester hours of credit.

Two graduate courses were offered during the winter term at the Lima Senior High School this year, and it was found that many teachers within the greater Lima area are eager to take courses and even pursue a Master's degree if they can do so within close proximity of their homes, rather than drive some distance to the UD campus.

Courses offered during the First Summer Session include EdC 583 GROUP PROCESS and EdF 591 ADVANCED PSYCHOLOGY OF LEARNING.

The Group Process course is designed to assist teachers, counselors, administrators and other professional educators to a more effective and appropriate use of groups. Emphasis will be directed towards the relationship between leadership skills and the effective functioning of various small groups. This course will be taught by Dr. Eugene K. Moulin, Professor and Chairman of the Department of Counselor Education at the University of Dayton.

Dr. Moulin has served the public schools as a teacher, counselor, school psychologist, Director of Psychological Services, Child Study and Research. He has directed funded research grants from the National Science Foundation, U.S.O.E. (Public Law 531), NEDA, Title V-A ESEA, Title III, on a variety of research topics. Dr. Moulin has been a visiting professor at nine universities throughout the United States. He has published in the area of psychological services, play therapy, group process, and the education of exceptional children and spoken at the American Personnel and Guidance Association Convention, Ohio Elementary School Guidance Association, Catholic Guidance Conference, Council for Exceptional Children, various universities, school systems, parent-teacher associations, professional clubs and on various television programs. Dr. Moulin recently traveled to the U.S.S.R. (Union of Soviet Socialist Republics) where he participated in a series of field study seminars which dealt with Soviet Pre-School and Higher Education.

The Advanced Psychology of Learning course will deal with topics related to: what is learning?, what factors are involved in learning?, awareness in the area of analyzing the learning process. Specific situations will be examined as much as possible to keep the course meaningful and relevant for teachers. The course will be taught by Dr. John R. O'Donnell, Professor and Chairman of the Department of Counselor Education at the University of Dayton.

Dr. O'Donnell has been a public school teacher and administrator. His higher education experiences include teaching at Penn State University, Rutgers University, Bloomsburg State College, Pennsylvania and Duquesne University. Articles by Dr. O'Donnell have appeared in numerous journals and magazines. He also has written two mathematics activities books for teachers. A partial list of organizations for which he has served as speaker or consultant: National Dietetic Association, National Association of Accountants, First International Congress on Mathematics Instruction, Lyon France; Cincinnati Society of Engineers, Western Pennsylvania Education Association, Ohio Education Association, McCall Corporation, National Council of Teachers of Mathematics, San Juan, Puerto Rico; Science-Research Associates. He has appeared on television in weekly series on Modern Mathematics, Science for home and school and developing creativity in children.

For more information on the courses or graduate program at the University of Dayton, individuals are asked to contact Drs. Moulin or O'Donnell at the University of Dayton, 229-3644 or to come to registration at Lima Senior High on May 4 from 6:30 to 8:30.
