News Release

UD OFFERS TECHNICAL CAREER WORKSHOP

DAYTON, Ohio, March 1, 1982 -- The Fourth Annual Career Workshop for Women with math, science, social science, and engineering backgrounds, funded by the National Science Foundation, is being offered by the University of Dayton School of Engineering at the Bergamo Conference Center on April 3, from 8 a.m. until 5:30 p.m.

The morning sessions focus on exercises designed to assess strengths and skills needed for future job opportunities and a look into the career prospects for technical people -- where will the jobs be tomorrow?

For women interested in expanding their resources for career information, a "networking" luncheon has been scheduled. Here participants can meet informally with speakers, panelists, and representatives from various professional organizations to begin or expand their career networks.

The afternoon will be divided into sub-workshops in such areas as assertiveness and negotiating, balancing career and family, interviewing, resume writing, and career changing through education. Other sub-workshops will focus on careers in medical settings, government, industry, and academia. Participants will be able to choose the sessions they are most interested in attending.

In addition, representatives from Wright State, Ohio State, Purdue, Miami, and Wilberforce Universities, Sinclair Community College, Antioch College, the University of Cincinnati, and the University of Dayton will be present to help participants become aware of the educational opportunities available at those institutions.

-More-
A registration fee of $20 covers the cost of materials, lunch, and coffee breaks. Applications and information can be obtained through the University of Dayton School of Engineering, (513) 229-2736. Registration is limited and the deadline is March 20. Interested persons are encouraged to apply early.
