PSYCHOLOGY COLLOQUIUM SET  
FOR NOVEMBER 19 AT UD

DAYTON, Ohio, November 12, 1982 -- "The Relationship Between Word Recognition Skills and Reading Ability" will be presented by University of Dayton professor David Zehr on November 19 at 3:30 p.m. in Sherman Hall 316.

Zehr earned his bachelor's degree from Penn State University, received his master's degree in social psychology from the University of Dayton, and is currently completing his doctorate in cognitive psychology at Kent State University.

The research to be presented by Zehr will discuss how the speed of various word recognition processes, the extraction of featural, name, and meaning information from words, distinguishes skilled from less skilled readers.

His lecture is the third in a four-part colloquium series and is free and open to the public. For more information, call the UD Department of Psychology at 229-2713.
