UD ENCOURAGES WOMEN  
IN ENGINEERING

DAYTON, Ohio, March 21, 1983 -- The University of Dayton and the U.S. Department of Energy announces the summer Women In Engineering Seminar/Institute. The program for sophomore and junior high school women will be held June 26 through July 1.

Activities for the seminar include "hands on" experiments where participants can work with faculty of the UD School of Engineering and staff of the UD Research Institute, a "Day with Industry," where participants will learn about the work world, and participate in planned "Industry Roundtable" discussions which will encourage interaction with several companies.

The goal of this UD program is to encourage more women to consider engineering as a vocational option. Questions such as: "What does an engineer do?", "where do engineers work?", and "what do students entering an engineering curriculum study?" will be answered.

For further information on tuition, costs, and application procedures contact Carol Shaw at the UD School of Engineering at 229-2736.
