PROFESSOR IS AT HOME WITH THE HOMELESS

In case you're planning any holiday features pertaining to the homeless, UD's Professor Mary Jo Huth would be excellent for background information, especially trends. Huth has served around the world on residential development task forces (including one for the United Nations). Last summer she was a member of a three-person team appointed by the U.S. State Department to attend, in Geneva, the 47th session of the Economic Commission for Europe's Committee on Housing. Huth is on sabbatical but can be reached through our office at 229-3241.

EXCEPTIONAL TEACHER HELPS EXCEPTIONAL CHILDREN

The Ohio Federation of the Council for Exceptional Children has named UD Professor Roberta Weaver as Educator of the Year. Weaver teaches teachers who deal with special education and over the last 20 years has been very active in statewide efforts to help the educatable handicapped. (A classroom situation would make a good visual).

UD BIOLOGIST'S RUSSIAN PEN PAL WRITES FOR PEACE

A. Kursanov, a Russian scientist, is fed up with nuclear armament in both his country and the U.S. He is a friend and colleague of UD professor Don Geiger and has been corresponding with the UD professor for more than 20 years. In a recent letter, Kursanov writes from Moscow that we must stop the "senseless ideas of nuclear war." The letter is interesting considering the Soviet's sanctions against protest statements. Perhaps contact could be made with Kursanov, and there is always the feature angle: the brotherhood of scientists transcending the world of politics. Call Don Geiger for more information at 229-2225 or 229-2521.
