UD HOSTS 16TH ANNUAL WOMEN IN ENGINEERING PROGRAM

DAYTON, Ohio, May 5, 1987—The University of Dayton invites high school women interested in engineering careers to apply for UD's 14th annual Women in Engineering Program, to be held on campus July 12 through 17.

Participants in the five-day program learn about college admissions, financial aid, options in majors and degrees, opportunities for women in engineering, and salary ranges. An industry roundtable will give students the opportunity to talk to female engineers about their careers. Other programs include a creativity workshop, computer use, and a day on the job in a laboratory or industrial setting. Participants live on the UD campus for the course of the program.

Several organizations are assisting the career awareness program by providing professional expertise and financial contributions. Contributors include General Motors Corporation, NCR Corporation, Procter & Gamble, and Dayton Power and Light.

Total tuition for the program is $435, and industry stipends of $240 are available. The deadline for application is May 29.

For more information about the program, contact Carol M. Shaw, assistant dean of the School of Engineering, Kettering Laboratories 201, at 229-4632 or 229-4606.
