News Release

DEADLINE EXTENDED FOR WOMEN IN ENGINEERING PROGRAM

DAYTON, Ohio, June 4, 1987—The University of Dayton has extended the deadline for applications for its Women in Engineering Program to Monday, June 22. High school women interested in engineering careers are invited to apply for the five-day program, to be held on campus July 12 through 17.

Participants in the program learn about college admissions, financial aid, options in majors and degrees, opportunities for women in engineering, and salary ranges. An industry roundtable will give students the opportunity to talk to female engineers about their careers. Other programs include a creativity workshop, computer use, and a day on the job in a laboratory or industrial setting. Participants live on the UD campus for the course of the program.

Several organizations are assisting the career awareness program by providing professional expertise and financial contributions. Contributors include General Motors Corporation, NCR Corporation, Procter & Gamble, and Dayton Power and Light.

Total tuition for the program is \$435, and industry stipends of \$240 are available. For more information about the program, contact Carol M. Shaw, assistant dean of the School of Engineering, Kettering Laboratories 201, at 229-4632 or 229-4606.
