News Release

UD RESEARCH INSTITUTE
AWARDED \$4.6 MILLION CONTRACT

DAYTON, Ohio, July 29, 1988--The University of Dayton Research Institute (UDRI) has been awarded a three-year \$4.6 million Air Force contract to conduct research in artificially structured materials for use in electro-optic devices, sensitive computing elements and other advanced electronic equipment.

UDRI researchers will evaluate and predict the behavior of artificially configured, extremely thin films produced by the Air Force Wright Aeronautical Laboratories at Wright-Patterson Air Force Base. The films, 100 times thinner than a human hair, are specially designed to respond to either electrical, optical or electro-optical stimuli.

UDRI, which employs 400 full-time scientists and researchers, has an annual research volume that exceeds \$30 million.
