### UNIVERSITY OF DAYTON KICKS OFF ADVANCED MANUFACTURING CONFERENCE WITH PUBLIC FORUM

DAYTON, Ohio, Oct. 19, 1988--The University of Dayton will kick off a two-day national symposium on competitive manufacturing with a public forum on productivity and employee involvement.

Mitchell Fein, a consultant who developed "IMPROSHARE," a plan 250 U.S. companies have adopted to divide productivity gains between management and workers, will talk about the gainsharing plan and other ways to raise productivity on Monday, Oct. 31 from 8 to 9:30 p.m. in the Dayton Convention Center.

Fein is a consulting industrial engineer primarily concerned with solving "the people problems" that arise between employees and management and retard productivity. Since 1937, he has served more than 500 companies in a broad range of industries, concentrating on developing ways to increase productivity. Fein lectures extensively to management groups in the U.S. and abroad.

Fein's address is part of a national conference hosted by the University of Dayton at the Dayton Convention Center Nov. 1-2. An estimated 500 of America's manufacturing leaders will gather together at "Competitive Manufacturing: Winning Management Strategies" to celebrate the resurgence of U.S. manufacturing and learn about successful management strategies.

Tickets to the pre-conference forum, which is free and open to the public, can be requested by calling Teresa Bohlander at (513) 229-4632.
