### INTENSIVE SUMMER PHYSICS COURSE TO BE OFFERED AT UNIVERSITY OF DAYTON

DAYTON, Ohio, December 28, 1988--An intensive summer program at the University of Dayton will allow college students to complete a one-year physics course in seven weeks. Offered for the tenth year by the UD Department of Physics, the course will begin on June 13, 1989. Classes will meet on weekdays and until noon on Saturdays during the length of the program.

The course, which has enrolled students on summer break from more than 35 different colleges and universities, is conducted in a summer institute style. Formal lectures will be combined with problem solving, tutorial assistance and instructor conferences. Joseph J. Kepes, UD professor of physics, will be the instructor.

This physics lecture and laboratory course is normally taken by premedical and other life science students. The course also meets physics requirements for virtually all college majors, except those in the physical sciences and engineering. The laboratory work is designed for the needs of premedical students by its use of experiments to illustrate basic physical principles. Modern electronic instrumentation is used.

Registration is limited. Students attending other universities and colleges who plan to return to the Dayton area for the summer are encouraged to apply. Housing arrangements in the UD Garden Apartments are available.

For further information and application forms, contact the Department of Physics, Sherman Hall 103, University of Dayton, 300 College Park, Dayton, OH, 45469 or call (513) 229-2311.
