NOV. 13-17: AIDS INFORMATION DAYS SERIES CONTINUES AT UD

The University of Dayton's AIDS Information Days Series will continue through Nov. 17 with activities designed to raise awareness about Acquired Immune Deficiency Syndrome (AIDS). Activities during the series are focusing on medical, social and emotional problems caused by the disease.

A recent study by the American College Health Association found that 30 out of 17,000 students tested positive for the HIV virus thought to cause AIDS. Statistically, this means that there are nearly two seropositives per 1,000 students.

All AIDS Information Days Series events are free and open to the public. This week's events include:
