DAYTON, Ohio, June 6, 1977 -- A workshop for high school counselors and science teachers is being offered June 13 through 17 at the University of Dayton. Women in engineering and technology -- opportunities and how to take advantage of them -- will be the subject of the workshop.

Participants will hear presentations in chemistry, physics, biology and engineering. Information on the latest techniques in career education and counseling will be offered. Industrial representatives will describe opportunities with their companies.

Information on using the computer for career education will be presented by Dr. Matthew Kabrisky, a research-engineer at the Air Force Institute of Technology. The workshop will be held in conjunction with the third annual Women in Engineering Seminar Institute which gives some 75 high school women the opportunity to spend a week on the UD campus and explore possible careers in engineering.

Sponsors of the workshop are UD and local industry. Cost of the workshop is $15 without credit or $58 for two quarter hours of graduate credit. Contact the UD School of Engineering for additional information at 229-3241.
