UD'S WOMEN IN ENGINEERING PROGRAM
DESIGNED FOR HIGH SCHOOL GIRLS

DAYTON, Ohio -- High school sophomore, junior and senior girls with an interest in math or science are invited to apply for the 18th annual Women in Engineering program to be held at the University of Dayton July 7-12. During the on-campus career awareness week, participants will attend classes with UD professors, meet women engineers and spend a day at a local industry to experience an engineering workday.

At the Women in Engineering program, students will explore careers in engineering and engineering technology and learn about college admission, financial aid, types of engineering degrees, career opportunities for women and salary ranges in the professions. An industry roundtable will give students an opportunity to talk to women engineers about career demands and expectations.

Applications are due May 31. Cost of the program is $225, which includes on-campus housing, meals and all activities during the five-day program. Approximately 100 girls from around of the country will be chosen to participate.

The Women in Engineering program is sponsored by approximately 40 technical societies, government agencies and local industries. For a brochure and application, write to the UD School of Engineering, Special Programs, 300 College Park, Dayton, Ohio, 45469, or call Maureen Gonzales at (513) 229-4645.
