Dear Honors Alumni, Students and Friends:

So much of this issue of *HonorsLink* is devoted to family — specifically, our family of Honors alumni. As I write these words — my very first “Director’s Note” — I have returned to my Honors family. From 2007 to 2012 I served as associate director of Honors at a time when the Honors Program was beginning its transformation. Under the leadership of my predecessor, Dr. David Darrow, the vision of a University of Dayton Honors Program that was more inclusive and offered a wider range of opportunities was realized. I feel so fortunate to “come home” to Honors and both embrace our Honors traditions and build on Dr. Darrow’s cultivation of so many new possibilities.

For the Honors alums that I haven’t met, I welcome the opportunity to hear about your experiences at UD and in the years since graduation; this issue of *HonorsLink* shares just a few of these wonderful stories. Also, to my former students — the ones subjected to my Honors English seminars and those assignments ranging from the analysis of British pastoral poetry to essays on the cinematic paranoia (and raging masculinity) of *Dr. Strangelove* — I hope you’ll forgive the strict paper grades and share your post-graduation stories, as well.

After all, we’re family.

Best regards,

John P. McCombe, Ph.D.
University of Dayton alumni are the best around. Regardless of their career paths, alumni revel in the opportunity to help current UD students with their goals. Want to learn more about a particular organization? Call an alum. Want advice on your next steps after graduation? Call an alum. Need a couch to crash on while looking for a place to live in D.C.? Call an alum. Our UD community does not end at the borders of the physical university — it extends to wherever alumni live. This is a very special quality of UD.

While chaperoning the Dayton2DC trip over spring break this year we met with many different alumni living there as the capital is home to the seventh largest UD alumni community. Alumni hosted us at their places of work, spoke on panels about their career paths and thoughts on graduate school and gave excellent advice on navigating the unique atmosphere that is Washington, D.C.

For me, the most heartwarming discussion was the confirmation that our UD spirit is alive in D.C. One alum described planning his move to the capital after graduation. He wanted to set up informational interviews with as many alumni as possible to better his chances of landing a good job opportunity. He emailed 33 alumni in the region who were pursuing careers in areas in which he was also interested. Of the 33 alumni he emailed, 32 responded saying they would be happy to meet and help in any way they could. This is our UD community.

With the DC Flyers program, I rely on the support of alumni to help place our cohort of students in relevant and engaging internships throughout Washington, D.C. Again, our alumni always amaze me — each is incredibly generous with their time, energy and willingness to assist current UD students. Our programs like Dayton2DC and DC Flyers would not be nearly as successful without the support of our UD alumni community. In one word, our alumni are amazing.

However, a few continuously go out of their way to help our students:

- J. Mark Brinkmoeller – Quest Scope
- Casey Clark – FTI Consulting
- Liz Clark – The National Confectioners Association
- Jed Gerlach – Plan International USA
- Ann Hudock – Plan International USA
- Former Ambassador G. Philip Hughes – White House Writers Group
- Laura Keivel – Arthritis Foundation
- Meghan Keivel – National Propane Gas Association
- Lauren Mooney – Center for Strategic and International Studies (CSIS)
- Rodell Mollineau – American Bridge 21st Century
- Tom Novelli – One Call Care Management
- Meg Poole – Meridian International Center
- John Porcari – Parson Brinkerhoeffer
- Julia Santucci – formerly with the U.S. State Department
- Zac Sideras – National Democratic Institute
- Mike Veselik – Convergence Center for Policy Resolution
- Mike Veselik – Convergence Center for Policy Resolution

And to the many alumni working on Capitol Hill: Erik Elam, Sam Hattrup, Dylan Moore, Amy Timmerman and Dominique Yantko, to name only a few — thank you each for keeping the Flyer spirit alive in D.C.!
Leigha Brisco ‘14
After graduating from UD in 2014 with a degree in civil engineering, Leigha Brisco moved to Atlanta, Georgia, in order to work as a project engineer at Whiting-Turner Contracting Co. The position is exciting for Brisco because it allows her to have a hands-on position that constantly keeps her on her toes. New challenges arise each day and every one to two years she is able to move on to a new project. Recently, Brisco was promoted to assistant project manager.

The first project Brisco worked on was the Science Learning Center at the University of Georgia. During the pre-construction phase, she worked on estimations, scheduling and monitoring overall quality and job safety. Although Brisco had initially intended to return to school for her Master’s degree, she does not need an extra degree for her current career path. Because of this, her continued education primarily deals with OSHA safety training and jobsite training.

Brisco credited the Honors Program and Honors thesis with helping her learn to push herself and think creatively. “You don’t have someone holding your hand in the real world, so you have to push yourself to think outside the box in order to solve problems as they arise every day.”

— Luke Kazal ’17

Emma DallaGrana ‘13
Emma DallaGrana graduated from UD in 2013 with a triple major in operations and supply management, international business and Spanish. Her first position was with the 3M Company, and it was a two-year rotational job which allowed her to gain exposure to multiple roles within the supply chain field.

Recently, however, DallaGrana moved out of the 3M position and switched to the smaller company, Amplify Snack Brands, which is known for its SkinnyPop brand, in Austin, Texas. At Amplify Snack Brands she works as a materials planner. She is particularly enjoying this position as it is fast-paced and part of an up-and-coming company.

DallaGrana credited the UD School of Business Administration for the real-world experience, and she thanked the Honors Program for instilling in her a love for travel: DallaGrana received a Hull fellowship in 2011, which allowed her to spend the summer in Spain.

— Luke Kazal ’17

Ian Dollenmayer ’16
After graduating in May 2016 with a degree in political science and philosophy, Ian Dollenmayer moved to Columbus, Ohio, to work as a legislative aide in the Ohio Senate. Dollenmayer took this position knowing it would be an excellent introduction to the world of politics, and it allowed him to continue working with Senator Hackett, on whose campaign he worked during his time at UD.

Dollenmayer believes this was the best possible way to start his career because his job puts him at the center of the office’s day-to-day operations. In addition to administrative tasks, he has been the primary communicator with constituents in the office and has helped the senior legislative aide on policy matters. Because of his work with Senator Hackett, Dollenmayer was promoted to senior legislative assistant to Senator Matt Huffman at the start of 2017. He is currently unsure if he would like to pursue an advanced degree since institutional knowledge can often prove to be more valuable.

Dollenmayer credits his Honors classes for equipping him with necessary skills for the political realm as they helped him learn to think more critically and to logically support his decisions.

— Luke Kazal ’17

Emily (Mitchell) Fellows ’06
Emily (Mitchell) Fellows, a 2006 chemical engineering graduate, started working immediately after graduation as a production engineer for a small chemical plant. This position attracted her because it offered experience in a variety of facets within the chemical industry.

She was responsible for the daily production, quality, safety and reliability of equipment lines which made specialty adhesives. After two years in this role, she moved to the company’s design engineering office, where she worked on improving existing plants. “I spent about 18 months traveling to India and China to support the construction and startup of a new facility, where I learned not only new skills as an engineer, but how to relate to people of other cultures and to expand my world view and comfort zones,” Fellows explained.

She then became the assistant plant manager of a larger facility in Houston, Texas, and is now the environmental, health and safety manager for a different Houston-area plant. Fellows found the challenging, supportive environment in the Honors Program to be formative in preparing her for the industrial workplace. “The Honors and Berry Scholars programs at UD encouraged you to expand yourself and develop skills that are outside of your core studies,” she said. “The challenges we faced during the capstone course, as well as our community involvement opportunities, helped me develop the teamwork and collaboration skills that have been the stepping stone to my rapid advancement up the corporate ladder.”

— Elizabeth Abrams ’17

Jane Kaufman Graham ‘08
Jane Kaufman Graham’s career has been shaped by the strong community she experienced at UD. “The sheer caliber of my classmates and the Berry Scholar program pushed me to think bigger and expect more of myself. I’m still in touch with many of them in my adult life, and they are still an inspiration to me and a testament to what we can do with an excellent undergraduate education,” Graham said.

A 2008 alum, Graham majored in both entrepreneurship and international business and minored in Spanish. After graduating, she took a position as an account development representative for Blackbuck, Inc., a global software company. Within her first four years, Graham received four promotions. She moved to a director-level job at age 29 and is now accountable for revenue retention of approximately $300 million across 25,000 customers.

As her career and responsibilities have grown, Graham has been able to use the sense of mission and values she learned at UD.

Graham continued on page 8
The Honors Program instilled in me the necessity of introspection, noble ambition, and the spirit of service from the get-go. It taught me how to think critically, be curious, and apply my learning to the real world. It was a huge portion of my identity and formed the foundation for who I am today.

— Elizabeth Pedrotti '17

thrive...in every way. The Honors Program instilled in me a greater sense of purpose and a greater understanding of my place in the world.

— Elizabeth Pedrotti '17

The Honors Program...has been instrumental in my professional growth and development. It has challenged me to think critically, to question assumptions, and to be open to new ideas. It has also provided me with a supportive community of peers and mentors who have encouraged me to pursue my passions and to aim for excellence.

— Elizabeth Pedrotti '17

The Honors Program gave me the opportunity to develop my research skills and to engage with a diverse community of scholars. It instilled in me a sense of curiosity and a commitment to intellectual inquiry. As a result, I have been able to pursue a career in academia where I can continue to explore and share my ideas.

— Elizabeth Pedrotti '17

The Honors Program...has taught me the importance of critical thinking and the ability to apply what I have learned to real-life situations. It has provided me with a network of mentors and peers who have supported me throughout my academic and professional journey.

— Elizabeth Pedrotti '17
Kelly Kolodziej '17

Kelly Kolodziej was ambitious with her studies, double majoring in operations and supply chain management and marketing, with a minor in accounting. Thanks to her hard work, Kolodziej has already secured a management associate sales position for after graduation that began during the summer after her May 2017 graduation. Looking back, Kolodziej attributes a part of her confidence and success to the Honors Program. “Through the generosity of Mr. Hull and the Honors Program, I was able to study abroad and really expand my world view,” she said. “Also the Honors classes I took prepared me better than I could’ve imagined.”

Andrew Tarutani ‘17

Andrew Tarutani’s wide variety of college experiences have led him to a position that is a perfect fit. A mechanical engineering major, Tarutani graduated in May 2017 and then began working for C&I Engineering in Louisville, Kentucky. “C&I is a consultant firm which works with several industries, including petrochemical and food processing,” he explained. Tarutani’s position focuses on improving processes for clients. His training in the classroom and the field will guide him as he generates ideas for how equipment can be better utilized.

One year from now, Tarutani hopes to be fully acclimated to his new job and working well with the experienced team of C&I employees. On a practical level, Tarutani also hopes to have taken the Fundamentals of Engineering test, moving him toward his ultimate goal of becoming a licensed professional engineer.

During his time as an undergraduate, Tarutani appreciated the Honors Program’s support for experiential learning, both in and out of the classroom. In addition to his co-op, he studied abroad in Guatemala twice and was able to live and work in Nicaragua last summer. Tarutani found the Honors Program’s willingness to work with students to pursue their specific programs of interest valuable as his post-graduate plans took shape.

Katherine Livick ‘17

Katherine Livick, a four-year Honors student with a major in political science and a minor in human rights, interned at the Jack Kemp Foundation, studied political science in D.C. and interned at a non-profit based in Seattle called the Borgen Project.

Although Livick has not secured a full-time position yet, she knows she would like to work near her hometown of Canton, Ohio, and is interested in work that allows her to utilize her interest in research. She mentioned that the Honors Program has served as a system of motivation for her — from the moment that she was accepted, she was determined to graduate with Honors. Livick’s well-rounded collection of experiences has molded her into a seasoned candidate for opportunity after graduation.

“IT’s so nice to be able to get a taste of a non-profit. This specific one is very involved; we are doing things related to policy, while at the Jack Kemp Foundation it was more about educating and advancing a certain idea. It’s interesting to get a different side of that,” Livick said.

— Anna Lagattuta ’19
This past November, the University of Dayton Chaminade Scholars planned and executed the first vocation conference at UD. The conference was organized by students who were inspired to spread their passion for vocation — particularly, its value and worth. The event featured three breakout sessions with seminars from several experts. Sean-Patrick Lovett, the keynote speaker, closed out the day, which was considered a vast success.

“Lovett is the director of English media at the Vatican Radio in Vatican City. As a cohort, we went to Rome over the summer and met him at the Vatican Radio, where he took time to get to know us and ‘see into us,’” said Lexi Miles, a senior who was a member of the conference planning team.

It was first proposed without expectation that Lovett speak at the conference; realistically, would he be able to come, given his distance from UD and his position in the Vatican? However, when he agreed, the students were thrilled and honored. According to those who attended the event, he was extremely well-received.

“I was surprised by how relatable the keynote speaker was! I knew he would be a really cool guy, but since he was from the Vatican I thought he may go a little over our heads. I was proven completely wrong. I had never felt more loved and appreciated by a stranger in my life,” said Lauren Vanisko, a sophomore who attended the conference. Vanisko went into the day unsure what to expect. Following the conference, she said she would easily give up another Saturday for a similar experience as it broadened her understanding of vocation and gave her valuable and practical insight.

“I believe everyone is really longing to find their place in the world, and students are searching for their vocations whether they know it or not,” she said.

Vanisko was just one student who proved that the hard work the Chaminade students put into the conference clearly paid off. Miles, who had a major role in the planning and execution of the event, spoke passionately about the topic of vocation and the desire to spread understanding around the campus. She and other members of the planning team recruited experts to speak at the event. “I was surprised at the attendance of the students all around campus on a Saturday afternoon and the way our cohort was able to pull together what we’ve learned and present in a way that welcomed others in. It was a success,” Miles said.

After holding several meetings to plan the conference, largely led by Tommy Tappel and Elizabeth Abrams, the team agreed upon a title: “The Art of Being.”

“It’s kind of what vocation is to some of us — it’s an art, and you’re constantly building a part of this masterpiece ... it’s fluid and always changing, but in every moment you’re contributing to the overall picture of vocation, or your masterpiece,” said Miles.

Many of the speakers involved and members of the planning committee mentioned how they would like to participate in an event like this again given its great impact and success. Hopefully, the conversations that occurred during the conference planted seeds that will grow and blossom into another extraordinary day.

Elizabeth Pedrotti ‘17

Elizabeth Pedrotti was ready to take on the world after her May 2017 graduation. Staying true to UD’s values of service to the community, the summer following graduation Pedrotti is working as a leader intern at the Freedom Schools, a summer school in a low-income area.

But before she left to serve other communities, Pedrotti was an Honors student who gave back to the Program. She put her skills as an English major to use as a reporter and editor for the HONORSlink. She also worked as staff in the Honors office during the summer of 2016.

Pedrotti said that writing alumni profiles for the HONORSlink was an uplifting experience. “It was inspiring to learn what alumni did after UD,” said Pedrotti. Thanks to a Fulbright scholarship, Pedrotti’s own future plans will take her overseas. In January 2018, she will leave to work in Malaysia where she will be an English teaching assistant and American cultural ambassador to middle-school aged students. But her departure is bittersweet. “I will miss the staff at the Honors Program,” Pedrotti said. “I built a great relationship with them working for the program over the summer [of 2016], and I will miss seeing everyone.”

Before leaving the University, Pedrotti wanted to thank the Honors Program and its staff for all they had done to help her throughout the years. “I could not have gotten my Fulbright without the help of Laura Cotten,” said Pedrotti. “She was instrumental.”

Thanks, Elizabeth.

— Monica Rook
Luke Kozal ‘17

Luke Kozal, mechanical engineer and UHP student worker since January of his first year at UD, was a jack-of-all-trades at the Honors Program over the last four years. His varied projects for the Program gave him a well-rounded experience.

Ready to take on any project or role offered, Kozal supported both staff and students alike. One major undertaking was when he researched and catalogued every known thesis advisor throughout the Honors Program’s 40-year history. This was one of his favorite projects, and it convinced him to pursue his own Honors thesis. “There was something really rewarding project he had during the year. “Working in the [UHP] office was a truly enjoyable part of my time at the University of Dayton,” said Kozal. “After four years in the office, I have a lot of fond memories” — from not being able to tell if David Darrow’s sarcasm was truly sarcasm to cracking Star Wars jokes with him; watching UD beat Ohio State with everyone in the office; all of the conversations with Ramona Speranza before and after work shifts; chatting with Jill Talley; bantering with John McCombe; being able to put a name to a face for almost everyone in his Honors graduating class: all things he will truly miss.

— Monica Rook

Elizabeth Abrams ‘17

Elizabeth Abrams contributed her gifts and talents to the Honors Program in many ways, such as serving as the Chaminade Scholar associate and as content manager for the HONORSlink. Abrams believed that being a part of the Honors magazine staff allowed her to learn from alumni and develop managerial skills. Abrams also credited her involvement with making UD feel a lot smaller. As content manager she could observe how paths crossed between current students and alumni. Her favorite article that she wrote was about the Visual Feast, a collaborative event with the Honors Program and the Dayton Art Institute. She enjoyed how she was able to gain a different and interesting perspective by interviewing the Graul chair, an endowed language and arts chair.

In the fall, Abrams will be attending Johns Hopkins University to pursue a Master of Science in public health through the Department of International Health in the Social and Behavioral Interventions Program. Thanks to the guidance of the Honors Program, she feels ready for her future. Applying for a Fulbright and writing a thesis were both educational experiences that helped prepare her for the research-oriented atmosphere at Johns Hopkins.

Abrams will miss the Honors Program staff because she has built strong relationships with them, and they have been incredible mentors to her.

Thanks, Elizabeth.

— Emma Kapp

EDITOR’S NOTE

Thank you and congratulations to all our HONORSlink staff members who graduated in 2017. Their contributions to the reporting, writing, editing and interviewing for the magazine were invaluable—Sarah Feldkamp, Gianna Hartwig, Kelly Koledziej, Luke Kozal, Elizabeth Pedrotti and Kristine Perez. Special thanks to our outgoing content manager, Elizabeth Abrams, who wore the many hats of content developer, staff and deadline coordinator, writer, editor and alumni contact, with grace, aplomb and excellent efficiency.
PRESTIGIOUS AWARDS

Elizabeth Abrams ’17: Maureen E. O’Rourke Marianist Student Award; American Society of Microbiology Undergraduate Travel Award

Raphael Crum ’17: 2017 American Physiological Society David S. Bruce Excellence in Undergraduate Research Award (one of fourteen)

Timothy Fasano ’17: Marianist Award for Voluntary Service to the Community

Hunter Johnston ’17: The Charles R. Kendall ’29 Memorial Award for Excellence in Academic and Athletic Effort

Claudia Labrador Rachel ’17: The James L. Heff ’17, S.M., Award of Excellence in Engineering and Humanities

Meg Maloney ’18: John E. Riley Award Recipient for sustained leadership through involvement with student initiatives and exemplifying the educational and service values of the University of Dayton and the Marianists

Kayla McLaughlin ’18: 2nd place in the Arthur W. Page Society Case Study Competition

Kira Ogburn ’17: The Fulbright English Teaching Assistant Award for Germany

Elizabeth Pedrotti ’17: The Fulbright English Teaching Assistant Scholarship for Malaysia

Dante Pezzutti ’18: American Physiological Society Summer Undergraduate Research Fellowship, an international competition awarded to only 24 undergraduate students
