About the University of Dayton and Environ

- Approximately 90% undergraduate students live on/near campus.
- 11% students from Dayton MSA (Fall 2016)
- Surrounding neighborhoods includes housing stock from early 1900s.
- Many houses now owned by University of Dayton.
- Students proud to live in these houses.

Workshop: House and Home Histories

- Co-curricular workshop
- Shared with History Department > overflow crowd
- Ancestry Library and Sanborn Map databases to explore neighborhoods around campus
- Playback.fm and Measuring Worth websites to add more context

Student Response

I LIKE: “Looking back at Dayton’s history and comparing today to then!” “Learning more about the community I live in today.”

I LEARN: “People used to live in the houses before UD and they were very determined to make a living.” “The history of the neighborhood goes way back! Cool people lived in the area.”

I WANT TO LEARN MORE ABOUT: “The ancestry of our student neighborhood”

ENG200 Student Feedback

“Working on this project taught me a lot about the new community of Dayton that I have become a part of in the last few years and what its struggles and strengths have been over the years. I was also able to get a first-hand look at the life of a community member and listen to what they had to go through and the love they have for this place. I feel that being a part of this project was significant for me not only because I learned about my new community but I also learned about my role as a youth that I will play for the future of my community back home and here at the University of Dayton.” – Student response

ENG200 Faculty Feedback

“In my experience, students approached the community based project with more enthusiasm. Because they were being asked to conduct primary research, both within the community and through Social Explorer and other library resources, students were able to draw more intimate connections not only with their assigned neighborhoods, but also with the research process as a whole. Being in the community and interacting with members of the community allowed students to trace the relationship between their data and research and the concrete, lived experiences of the communities they were researching. Furthermore, I saw how some students were drawn to the interactive nature of Social Explorer, and in return I feel that students who might have balked at the use of traditional database research found an interest in the visual and multi-modal features of the platform.”

Library Instruction

Sophomore-level writing course, ENG200
Experiential learning component via Facing Project
Assignment: Final course project requires a profile of a Dayton neighborhood. The project goal is to identify some of the challenges and opportunities existing in the neighborhood. To accomplish this, you will work with a partner to collect primary and secondary data on the neighborhood, including history, physical geography, demographics, economic characteristics, visuals.

LIBRARY SESSION 1
Prework: Submit 3 questions related to neighborhood demographics. Examples: How many single mothers are raising children in Twin Towers? What is the average value of a house in the Madden Hills neighborhood?
Session: Social Explorer, Census data. Guided worksheet.

LIBRARY SESSION 2
Find secondary literature and additional primary source materials, including local documents
Result: 2 essays published in undergraduate journal
