A Social Justice Learning and Living Cohort Community Project

2012 Service Learning Experience

Leadership and Service: A Social Justice Approach

Social Justice Mission

Building Communities for Social Justice LLC Mission Statement

- Engaged in a process of intentional capacity building
- Productively engages and creates space for critical reflection and the buy-in of others
- Relates directly to academic, vocational, and co-curricular experiences
- Delivers the particular methodologies of the discipline to community partners
- Promotes an interdisciplinary approach to fundamental human concerns e.g., what it means to be human
- Promotes an appreciation and understanding of multicultural ethical and religious traditions
- Engages undergraduate research that is informed by the experiences of service learning

Social Justice Mission

Holy Angels Mission

Holy Angels mission is to provide a challenging educational experience to the students from kindergarten through the fifth grade. The school is committed to helping their students grow in their faith life and in academics. While working at Holy Angels, we partook in several activities with the students such as tutoring students with the alphabet, reviewing vocabulary words, assisting kids with their homework, playing basketball, and engaging in other forms of physical activity. While working at Holy Angels, we were able to form bonds with the children and staff. We love all the people that we worked with through our experiences in the Social Justice Learning and Living Community.

Outcomes

- Work with the students on their alphabet.
- Work with more than one student at a time.
- Help in some understated because of the added academics.
- Mentor students in mathematics skills.

Reflection

There were students that I was asked to work with and we were required to tutor. As student tutors in Holy Angels School, we were supposed to tutor students in the alphabet. After tutoring several students, we realized that we were not helping the students with their alphabet. We needed to work on teaching the students how to read. This was a great opportunity because it helped us develop our understanding of the community and it allowed the students to lead us toward understanding about being in the community. Holy Angels students were happy when we would work with them in a variety of subjects. They looked up to us as role models and it made us feel good that the students would be so excited to work with more than one student at a time. This was good because it helped us develop our understanding of the community and it allowed the students to lead us toward understanding about being in the community. Holy Angels students were happy when we would work with them in a variety of subjects. They looked up to us as role models and it made us feel good that the students would be so excited to work with more than one student at a time. This was good because it helped us develop our understanding of the community and it allowed the students to lead us toward understanding about being in the community.

A Theory of Social Justice

Mike Sandel is an American philosopher who taught at Harvard University and is known for his work in political philosophy, social theory, and political economy. He is the author of "The New Liberalism: The Ideas of Social Justice," which is amongst his most popular works. It is a philosophical study about the theory of justice, and here we provide simply it. It is a story of people who are put into a cave and see shadows. The only way that they experience reality is by the shadowy images projected onto the wall because of the fire burning behind them. If we turn on the light and allow shadowy images to proceed, then the students who live in the world with us would have a better understanding of what the world is like around them as a daily basis.

The Cave

The Cave was an ancient Greek philosopher who wrote "The Cave." Plato worked in ancient Greece around 400 B.C. Plato has thirty three dialogues and is known for his stoicism of works. The Cave is amongst his most popular works. It is a philosophical story about the theory of truth, and here we provide simply it. It is a story of people who are put into a cave and see shadows. The only way that they experience reality is by the shadowy images projected onto the wall because of the fire burning behind them. If we turn on the light and allow shadowy images to proceed, then the students who live in the world with us would have a better understanding of what the world is like around them as a daily basis.
