### UNIVERSITY OF DAYTON SELECTED AS NCR-UNIVERSITY STAKEHOLDER PARTNER

DAYTON, Ohio, April 7, 1989--The University of Dayton is among 16 universities in the country selected as an NCR-University Stakeholder Partner.

NCR officials describe the company's stakeholders as employees, customers, suppliers, communities and shareholders. This new program, designed to reward university students and faculty who demonstrate creativity and innovation, expands the stakeholder concept to universities.

"NCR understands well that the greatest creative resource for the future of our country consists of the students and faculty in our universities," said Charles E. Exley Jr., chairman of the board and chief executive officer of the Dayton-based company. "By working with these selected universities, we will seek to identify and honor those students and faculty who will renew the innovative spirit of America."

As a university stakeholder partner, UD will receive each year, for three years, five microcomputers. They will be awarded to an undergraduate student, graduate student and faculty member in the Department of Electrical Engineering and an undergraduate student and faculty member in the School of Business Administration.

In Ohio, Case Western Reserve University, Central State University, Miami University, Ohio State University and Wright State University have been selected. Other universities involved include the University of Virginia, Washington University, Pennsylvania State University, Duke University, Columbia University, Cornell University, California Polytechnic, University of California at Berkeley, University of California at San Diego and State University of New York at Stony Brook.
